District Drenched by Steady Rain

Starting about 9 p.m. on Monday, Rainfall was Practically Continuous till 9 a.m. this Morning

Farmers are Jubilant

A steady rainfall, which is reported to be general along the Goose Lake Line, started in this district on Monday evening and continued steadily until about 9 a.m. this morning. Moisture conditions so far as the present season is concerned have been good, and the 36 hours rainfall just completed should carry the crop along safely into July with normal weather for the balance of this month. It is some years since the outlook at this particular season has been so good and a cheerful spirit of optimism is very much in evidence.

Public Health Notice

PREVENTION OF DIPHTERIA

At the request of the Department of Public Health at Edmonton, the preventative treatment for diphtheria has been well started, 54 children having completed the course to date.

The Oyen Public Health Board and Oyen School Board wish to hereby announce that they have now completed arrangements whereby all past and future treatments for the prevention of diptheria have been and will be free of all cost to any person in the Oyen School District or residing within the Village of Oyen.

These treatments may be had in any home in the Village of Oyen, or on Thursday afternoons at the Oyen Public School.

RED ROSE COFFEE "is good coffee"

"Dont's" and "Do's"

With the coming of the summer vacation period, the opening of summer cottages, the flocking of people to resorts, and the inauguration of automobile touring parties, the time has also come when all those who enjoy the advantages of these pleasures and health-giving pursuits should give heed to the taking of those little precautions which require attention if real benefit and not harm is to result from a holiday.

People living in cities and towns with all modern conveniences at hand are sometimes apt to take unnecessary chances, and to neglect matters which are so essential to the maintenance of good health and the obtaining of full enjoyment and benefit from the relaxation which summer vacations afford. Because of these little overslights it has been demonstrated on more than one occasion that epidemics of sickness have had their origin in summer camps and vacation resorts.

Quite a few "don'ts" are urged upon the attention of summer campers and vacationists, but all too frequently the things which ought to be done are overlooked. For example, people are urged not to leave a camp fire until they are assured that the last spark has been extinguished. They are warned not to unnecessarily cut down or mutilate trees and shrubs. Touring motorists are even asked not to pluck wayside wild flowers only to have them wither and die in a few hours, but to leave them blooming in their natural state, thus adding to the beauty of the highways and adding to the pleasure of all.

But there are "do's" which are equally, possibly more, important. The city camper, used to turning a tap in order to obtain pure water, should pay close attention to the source and quality of the water he uses for drinking and cooking purposes. Disposal of camp refuse and garbage demands careful attention. In towns and cities where there is methodical collection and destruction of such waste matter by the municipal health authorities, people are apt to forget that at camp and in summer resorts that duty involves upon themselves and that their own health, as well as of others, and the maintenance of enjoyable surroundings, depends upon how efficiently this is attended to. The proper thing is to bury all such matter, and bury it deep. Too much emphasis cannot be laid upon the importance of proper sanitary arrangements in camps, no matter how small, and at all summer resorts.

In every summer cottage, and included in the equipment of all touring parties, there should be a small First Aid kit, containing those few simple but essential things required in case of minor accidents, poisoning, severe sunburn, etc. Remembering that a doctor or nurse may be many miles distant such simple remedies, and the easily understood directions which go with such a kit, may result not only in relieving pain and discomfort, but actually preventing serious illness.

A little consideration given to these matters at the opening of the camping season may mean all the difference between a summer vacation proving both enjoyable and beneficial and just the reverse.

A Non-stop Motor Trip

Two U.S. Men Attempting Drive From Coast to Coast

From coast to coast without permitting the wheels or motor of their automobile to stop is the large undertaking to be attempted by Lieutenant Leigh Wade, one of the United States aerial world fliers, and Linton Wells, a writer. The two men have been in New York completing plans for the trip.

Never before has a non-stop drive from coast to coast been attempted. Wade and Wells are optimistic and expect to complete the trip successfully, arriving at Los Angeles or San Francisco in seven days.

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Alberta Secures New Settlers

Large Number Have Arrived to Take Up Land This Spring

Considerable immigration has taken place into Alberta within the past month, large numbers of settlers arriving chiefly from British and European countries. Many inquiries from prospective settlers are being received at the offices of the provincial publicity commissioner and by the federal offices. During one week recently more than twenty homesteads were filed on at the Edmonton land office.

Tubular Camera Invented

A tubular camera, to be rammed down throats for the purpose of photographing the interior of stomachs, was exhibited at the convention of the American Pronchoscopic Society.

An Underground Garage

Parking Spaces Beneath Leicester Square, London, Would Relieve Traffic

An underground parking place is planned beneath Leicester Square, London. The model provides that Leigh Wade, one of the United States aerial world fliers, and Linton Wells, a writer. The two men have been in New York completing plans for the trip.

Never before has a non-stop drive from coast to coast been attempted. Wade and Wells are optimistic and expect to complete the trip successfully, arriving at Los Angeles or San Francisco in seven days.

Two entrances and exits will be necessary in case of breakdowns, accidents and repairs, but the entrances and exits would be easily controlled. All the parking space would be available without crossings, as the traffic would circulate in one direction only. Stairway accommodation would be provided between the underground garage and the street level.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Factory Made 2,966,000 Rifles

At a luncheon to Australian school boys who visited Birmingham Small Arms Factory, P. Hannon, M.P., said that the factory's output of rifles during the war was 2,966,000.

B.C. Whaling Operations

Whalers operating out of British Columbia ports this season are expecting a good catch. The stations at Rose Harbor and Naden Harbor will both be operated.

Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

Italy Will Pay Savs Premier

War Debt to United States Amounts To $2,138,543,852

Italy's sacrifices in the world war and her lack of riches entitle her to be placed in the category of privileged nations in regard to her war debts to Great Britain and the United States, in the opinion of Premier Mussolini, who spoke before the senate on the foreign affairs budget.

Italy's war debt, said the premier, amounted to 100,000,000,000 lire, half of which was to the United States. (Italy's war debt to the United States amounts to $2,138,543,852.)

"The Italian Government recognizes its debts and has declared that, compatible with its present and future economic and financial situation, it will face its debts," the premier said.

Joint Stiffness Goes, Swellings Disapper, Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 35 cents at all dealers.

To Produce More Butter

Prairie Farmers Are Getting a New Record For This Year

The Canadian prairie farmers have set 25,000,000 pounds of butter as their objective for 1925.

Last year the farmers and dairies combined produced 22,000,000 pounds of butter, but as the report market has made rapid strides for Western Canadian butter, the dairies have induced the farmers to produce more cream.

A GRATEFUL LETTER

From a Lady Made Well By Dr. Williams' Pink Pills

"I wish from my heart I could meet or write to every person who is run down in health to give Dr. Williams' Pink Pills a trial." This writes Mrs. Louis Mitchell, Oak Point, Man., who further says:—"About a year ago I was a weak woman, suffering from a run down system and impoverished blood. Any little exertion would leave my legs to tremble and my heart to throb violently. I could not sweep a room or walk fifty feet without being exhausted. Then I began taking Dr. Williams' Pink Pills and after taking only six boxes I am as well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills will be my stand-by in the future if ever any trouble arises building up again, and I shall always find pleasure in recommending them to anyone needing a tonic.

There are many troubles due to weak, watery blood which can easily be overcome by a fair use of Dr. Williams' Pink Pills. The sole mission of this medicine is to enrich and purify the blood and when that is done all the varied symptoms of anaemia disappear, and good health returns. You can get these pills through any dealer in medicine or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

First Typist Passes

The First Woman to Operate a Typewriter For a Salary

There has just passed away in New Jersey at the age of 75, Mrs. Mary Saunders, who was the first woman to work a typewriter for a salary and as a recognized occupation. When Mrs. Saunders first became a typist she used a machine that nowadays would seem only an interesting relic of a primitive past. It was ridiculously slow, but before she retired Mrs. Saunders was typing 100 words a minute on better machines. So smoothly and imperceptibly has the typewriting machine clicked its way into favor and power that people are apt to forget how much they owe to it, and that there was a day, not so long gone, when all such devices were regarded as nothing more than ingenious and impracticable toys.—Vancouver Province.

Woman Motor Driver

Miss Marjorie Baiten, a London woman who served in the Women's Legion, takes her place daily at Bournemouth as owner-driver of a 14-seater motor coach. She is believed to be the only woman motor coach driver in England.

Monkeys of Borneo are so troublesome to rubber growers that the plants while young are guarded.

Jealousy At Empire Show.

Some Overseas Workers Think They Should Receive Official Recognition

When the British Empire Exhibition at Wembley closed last year there was keen disappointment among the persons who had actively participated in the big show because no titles or other honors were bestowed upon them in recognition of their services.

Some of the dominions, not including Canada, felt hurt that, while the English chairman of the exhibition standing committee, Sir James Stevenson, was elevated to the peerage as Baron Stevenson, and the two lumbaries of the exhibition next to him were the recipients of minor titles, no such recognition was accorded overseas workers.

Truth says very few officials of the British Empire Exhibition last year deserved any recognition whatever, seeing that they were absurdly overpaid and received extravagant entertainment allowances. One of the mistakes which caused last year's losses, Truth says, was the conflict between the military and civilian administration of the exhibition, and the bickering of last year is being continued this year.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Two Valuable Recipes

One Egg Cake

¼ cupful Borden's St. Charles Milk, diluted with ¼ cupful cold water.
½ cupful vegetable cooking oil, scant
2-3 cupful sugar.
1 egg
1½ teaspoonful salt.
1½ teaspoonfuls baking powder.
1½ cupfuls sifted flour.
½ teaspoonful vanilla.
½ teaspoonful lemon extract.

Beat the egg light and cream it with the sugar, salt and flavoring. Combine the milk, diluted, with the cooking oil. Sift together the dry ingredients and add them alternately to the first mixture with the milk. Beat thoroughly, turn into a lined, medium-sized pan and sprinkle nut meats, chopped raisins or cocoanut over the top. Bake in a moderate oven for thirty minutes.

Strawberry Short Cake

2 cupfuls flour.
2 teaspoonfuls baking powder.
1 teaspoonful salt.
2 rounding tablespoonfuls butter.
2 rounding tablespoonfuls granulated sugar.
¼ cupful Borden's St. Charles Milk, undiluted.

Sift all the dry ingredients together, work in butter, as you would for pie crust, add the milk, beat with spoon (it will be very stiff) and bake 20 minutes in an oblong pan. Split the cake with a hot knife, butter the two sides and put them together with two quarts of strawberries which have been cut into small pieces, sweetened and allowed to stand before placing on cake.

Birmingham, Eng., produces the largest variety of manufactured goods of any city in the world.

Children Quickly Learn To Rely On Cuticura

To soothe and heal the rashes and skin irritations of childhood. Daily use of Cuticura Soap, assisted by Cuticura Ointment, will keep the skin and scalp clean and healthy and prevent simple irritations from becoming serious.

The Typical Englishman

Portraits Drawn of Him Are Not True To Life

Foreigners, particularly in those moments when ill-will guides their satirical pencils, have a clear view both of his outward appearance and of its implied mates. They see him as a tall, fanged, hollow-cheeked giant, sharp with the angles of arrogance and heavy with the boots of stupidity and didacticism. That portrait of him we know to be unjust; we are prepared to swear, at any rate, that, contrary to the opinion of European caricaturists, a typical Englishman seldom wears a kilt, and that the thickness of his boots is due rather to the climates in which he is accustomed to live than to any brutal desire in him to tread upon the corns of sensitive strangers. The portrait that they draw of him when they are annoyed is indeed inaccurate, but is it any more inaccurate than his own traditional representation of himself as John Bull?—London Times.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, Dr. Kellogg's and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Builds Safer Monoplane

Invention of Famous Dutch Aviator Will Lessen Danger

Herr Fokker, the famous Dutch aviator, has built a new monoplane that is very much safer than any other machine now in use. By a re-arrangement of balance and perhaps by other expedients of construction that he has not explained he has produced a plane that has very slight tendency to dive nose foremost when the power is suddenly shut off, accidently or otherwise. The other day at Croydon, England, he showed how he could stall his engine a thousand feet in the air, and then with arms folded descend, his monoplane on almost an even keel, to a point where a safe landing could be made. A new British aeroplane has been designed to accomplish the same result by means of slotted wings that divert the air currents when the plane comes to move forward, so that it remains virtually on an even keel.—Youth's Companion.

MOST OLD FOLKS REQUIRE A HEART AND NERVE TONIC

After middle age little sicknesses and ailments seem harder to shake off than formerly as the heart action becomes weak and uncertain and the nerves are not as steady as they were in the younger days.

Now is the time when all aged people who wish to maintain their health should get and retain their energy unimpaired should use

MILBURN'S HEART AND NERVE PILLS

Mrs. M. O'Connor, Whitestone, Ont., writes:—"I have been troubled, most of my life, with shortness of breath, palpitation of the heart, and fainting spells. I was advised, by a friend, to try Milburn's H. & N. Pills, which I did, and at once found relief, and I have never had a really bad spell since. I am 80 years of age and I always keep them in the house, and feel that with their help I will see many years yet. I always recommend them to anyone who is suffering from heart trouble."

For sale at all druggists and dealers.

Scots Desert Porridge

Ham and eggs have replaced porridge as the popular breakfast dish in Scotland. The decline of the use of porridge, it was brought out recently at a board of agriculture inquiry, is attributed to a change in the national diet and began 10 or 12 years ago.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Facts About Infant Mortality

Interesting Discoveries By U.S. Department of Labor

More babies born during June die during their first year than those who are born in any other month. Those born during August stand the best chance. Twenty-five per cent. more boy babies die during the first year than girl babies. First year mortality rates among babies varies inversely with the earning capacities of their fathers. These were some of the facts discovered by the children's bureau of the U.S. department of labor recently in a study of the first year of 23,000 babies born in eight selected cities.

Minard's Liniment for Backache

A man may shut his eyes to a painful truth, but he seldom shuts his ears if the aforesaid truth happens to be about his neighbor.

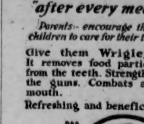
Minard's Liniment For Corns and Bunions

WRIGLEY'S

"after every meal"

Parents—encourage the children to care for their teeth!

Give them Wrigley's. It removes food particles from the teeth. Strengthens the Gums. Combats acid mouth. Refreshing and beneficial!



Old Ship Renovated

The Discovery, the old ship in which Capt. Scott made his memorable voyage to the Antarctic in 1901-4, has been partly rebuilt and refurnished at Portsmouth, and is now ready for another long voyage. She is a small, stoutly-built vessel, of about 750 tons.

Relieved Of Rheumatism and Lumbago

Now Quebec Man Recommends Dodd's Kidney Pills

Mr. George Tremblay Was Unable To Work But Is Now In Good Health

St. Marie, Que.—(Special).—"Your Dodd's Kidney Pills have done me a lot of good," states Mr. G. Tremblay, who is well-known and highly respected here.

"When I sent for them I was unable to work. I took ten boxes and to-day I can do my work and am without pain. I recommend them to all who suffer with backache, rheumatism and pains in the kidneys."

Dodd's Kidney Pills are not put forward as a cure-all, but for the specific maladies for which they are recommended, namely, rheumatism, backaches, diabetes, dropsy, lumbago, urinary troubles and heart disease.

Dodd's Kidney Pills act directly and promptly on the cause of the trouble. They do not cause any derangements in the natural functions of any organ.

Dodd's Kidney Pills relieve after every other means have failed.

Modern Methuselah

The world's oldest man is believed to be a Kurd, named Noro, born in 1775, says the newspaper, La Bulgaria. A son of this 160-year-old man and his only descendant, died last year at the age of 97. In Jugo-Slavia is a man said to be 112 years old.

Alberta's Foreign Population

Alberta's total foreign population, according to a recent bulletin issued by the bureau of statistics, is in excess of 180,000 with approximately 100,000 Americans included in this total. About 5,000 Americans are resident in Calgary.

Ozark is a corruption of the French word aux arcs, and means "with bows," a term descriptive of the Indians who formerly inhabited the country.

A billion dollars' worth of American Liberty bonds have been converted into worthless securities.

T. B. RESEARCH WORK PROGRAM BEING PREPARED

Ottawa.—A "very definite and complete programme for tuberculosis research" has been perfected at a joint conference held here under the auspices of the national research council and the federal department of agriculture.

The conference, described as one of the most important scientific conferences ever held in Canada, met under the joint chairmanship of Dr. H. M. Tory, president of the national research council, and Dr. A. H. Grisdale, deputy minister of agriculture, to review the present situation in Canada in connection with tuberculosis, and to discuss the possibilities of solving, through scientific research, problems relating to tuberculosis in man and animals. More than 25 prominent Canadian scientists attended the conference.

Recognizing that the time had arrived to co-ordinate and stimulate research work in Canada on the subject, if the problems related to tuberculosis were to be solved, the research council appointed an associate committee comprised of most of the leading bacteriologists and pathologists in Canada, together with representatives of the federal department of agriculture and of various other organizations actively interested in the question. The committee was in session two days.

Besides the joint chairmanship, Dr. Tory and Dr. Grisdale, the following westerns are on the associate committee on tuberculosis research:

Dr. S. Hadwen, research professor of animal diseases, University of Saskatchewan; George Hutton, natural resources department, Canadian Pacific Railway, Calgary; Dr. A. Rankin, professor of bacteriology, University of Alberta; Dr. A. Savage, professor of animal pathology, University of Manitoba; Dr. P. Talbot, provincial veterinarian, Edmonton. S. P. Eagleson, secretary of the national research council, is executive secretary of the committee.

Unique Ceremony In Winnipeg

"Unknown Soldier's Cross" From Flanders Presented To Toc H.

Winnipeg.—A ceremony such as has never before been witnessed in Canada marked the solemn presentation of the "Unknown Soldier's Cross" at the headquarters of Toc H. (Talbot House), by Major-General H. D. B. Ketchen, officer commanding Military District No. 10 Saturday. The little wooden cross, with the mud of Flanders still clinging to it, was forwarded to Mark One of the Empire-wide organization, by Field Marshal Lord Plumer as a symbol of sacrifice.

The cross once marked the grave of a Canadian soldier who gave his life in service on the battlefields of Flanders and whose identity never has been established.

Veteran and other patriotic organizations attended the impressive ceremony.

Winnipeg Firm Gets Elevator Contract

Will Erect $876,729 Building at Prince Rupert, B.C.

Ottawa.—The contract for building the new grain elevator at Prince Rupert, B.C., has now been accepted by the government, according to an announcement made by Hon. Thomas Low, minister of Ports and Harbors.

The name of the successful tenderer is Carter, Halls, Aldinger Company, Limited, of Winnipeg, and the contract price is $876,729.

The contract awarded to the Winnipeg firm includes the building proper, but not the foundation. The latter has been constructed by the Northern Construction Company at a cost of $220,000.

Public Shooting Grounds

Edmonton. — Thirty-two public shooting grounds in Alberta will be available for general use next shooting season, under the new regulations recently made by the Dominion authorities. The location of these grounds has now been announced, an order-in-council having been passed at Ottawa setting forth the particulars of areas thus reserved in the three prairie provinces.

Death Toll In Jap Earthquake

Tokio.—The latest official estimates of the casualties from the earthquake which shook the Tajima district, northwest of Osaka, last Saturday, place the number of dead at 245 and injured at 482. Throughout the district affected 3,516 houses collapsed or were burned.

Protest Against Changes In Soldiers' Settlement Act

Winnipeg.—In protest against proposed changes in the Soldiers' Settlement Act, immediate representation will be made to the Dominion Government by the Manitoba Command of the Great War Veterans' Association, it was announced here. Officials of the organization maintain that the suggested amendments are not in keeping with the interest made by the G.W.V.A., and generally are unsatisfactory to the soldier settlers.

Discuss Administration Of Canteen Funds

Very Doubtful If Detailed Statement Will Be Furnished

Ottawa.—The assertion that it was extremely doubtful if a detailed statement of all specific items of expenditure would be furnished by the Dominion Command of the Great War Veterans' Association, regarding monies received from the canteen funds, marked the inquiry of a special committee of the senate, into the administration of the canteen and disablement funds, the uses to which advances from these sources have been put, and the sale and manufacture of paper poppies. Payment of $25,000, by the Great War Veterans' Association for stock in The Veteran newspaper, and a further payment of $8,000 for subscriptions to The Veteran, also came under discussion.

It was explained that all the funds of the association were merged in one consolidated account, and that moneys received from the canteen fund had been given to extend the scope and usefulness of the association.

A statement of expenditures from this consolidated account was, however, available.

Would Like To See Canada

Duchess of York Expresses a Desire to Visit the Dominion

London.—"I would like to arrange with my brother-in-law, the Prince of Wales, for a stay at his ranch in Canada," was one of the many observations appreciative of the lure of Canada made by the Duchess of York, who, with the Duke of York, paid a surprise visit to the British Empire Exhibition at Wembley, similar to that paid by the King and Queen.

Most of the time of the Duke and Duchess of York was spent at the Canadian pavilion. The Duchess was very much interested in the exhibits from Canada, and told the Canadian officials that she was very anxious to visit the Dominion, never having been there.

Communists On Rampage

Terrorize Council Members In Town In France

Paris.—Communists invaded a meeting of the city council at the city of Ville Neuve-Le-role, and compelled the members of the council to sign a document, proclaiming the dissolution of that body. The Communists then forced the councillors to leave the room in the city hall, where they had been in session. Later, police, summoned by the ousted city officials, attacked the invading Communists and routed them.

More Automobiles In Alberta This Year

Licenses to Date Almost Reach Last Year's Total

Edmonton.—It looks as though the motor car population of Alberta this year will considerably out-number anything the past has known. To date about 47,000 automobile licenses have been issued by the provincial secretary's department, as against 47,-900 for the whole of last year. And there are seven months still remaining for more business.

Disarmament In Sweden

Stockholm, Sweden.—Reduction of the standing army and postponement of the naval building programme as contained in the Swedish armament bill, was adopted by the Lower House recently. The present standing army of six corps will be cut to four, while any definite programme of naval building must be postponed.

Columbia.

Will Not Negotiate With Soviets

London.—Foreign Minister Chamberlain, answering questions in the House of Commons, declared the British Government had no intention of resuming negotiations with Soviet Russia.

Mr. Chamberlain said: "I should, of course, consider any proposals made to me, but I have no intention of initiating them."

E. Roy Sayles, Manager and Treasurer of the Canadian Weekly Newspaper Association, who will attend the Convention in Winnipeg, June 24, 25, and 26.

Mounties Could Have Joined Wembley Parade

Left Out to Reduce Length Is Explanation Given

London.—The department of overseas trade informs the Canadian Press that the reason why the members of the Royal Canadian Mounted Police, now doing duty at the Canadian pavilion of the British Empire Exhibition, had not a place in the military procession in connection with the Empire Thanksgiving service in 1925, was because the department was under special instructions to reduce the length of the procession this year, instead of having it as long as it was last year.

If the Canadian authorities had asked for the Mounted Police to be included in the parade, the department states, arrangements for this would gladly have been made.

WILL POINT OUT DEFAULTS IN A NOTE TO GERMANY

London.—Germany's defaults relative to disarmament, as specified by the Treaty of Versailles, have been outlined for presentation to Berlin in a note that probably will be dispatched this week by the council of ambassadors.

The note and a covering letter, which have been agreed upon by France and Britain, will point out that, in view of the fact that the allied committee of control has concluded that Germany has not fulfilled all of her disarmament obligations, the allied experts have agreed upon a list of defaults which will be in very plain language.

On the whole, France considers Germany has fulfilled her obligations in the destruction of armaments, say French authorities here, but there are still 30 or 40 factories for war materials which yet are to be transformed into commercial establishments. Objection also has been raised to the large German war staff and the state police.

Man Has Miraculous Escape

Carpenter Used Plank to Break Fall From Fifth Story

San Francisco.—Using a 15-foot plank for a parachute, Ralph Harth, a carpenter, employed on a new building here, accidentally descended from the fifth story to the sidewalk unharmed, save for a slight shock.

Harth was pushing up the plank when he fell down the scaffolding. He held fast to the timber and the area it exposed to the wind broke his fall. Doctors at the hospital where he was taken for examination, declared his escape from instant death was a miracle.

Noted Scientist Dead

London.—Sir William Fletcher Barrett, scholar and scientist, died here at the age of 81. Sir William founded the Society for Psychical Research and formerly was its president. His writings covered a wide field of philosophy, science and psychical researches.

Soviets Give Trotzky Position

Moscow.—It was officially announced that Leon Trotzky, former minister of war, who recently has been in political disfavor, has been appointed a member of the presidium of the supreme economic council and chairman of the general concessions committee.

Story Of Tragedy

Ottawa.—Hon. Charles Stewart, minister of the interior, said in the house that he was having the papers prepared respecting the fatal Wrangel Island expedition, and they would be presented to the house shortly.

C. W. N. A. Convention

Splendid Programme Arranged For Gathering in Winnipeg on June 24, 25 and 26

The Canadian Weekly Newspaper Association, whose membership is Dominion-wide, will hold its annual convention this year in Winnipeg on June 24th, 25th and 26th. A large attendance from both Eastern and Western Canada is assured, and it is estimated that between four and five hundred delegates will register. Elaborate plans are being made for the reception and entertainment of the newspaper men, and a most successful convention is anticipated. On Thursday, the 25th, the Provincial Government will tender a banquet to the delegates at the Manitoba Agricultural College at which addresses will be given by Premier Bracken of Manitoba, Premier Dunning of Saskatchewan and Premier Greenfield of Alberta. The City of Winnipeg will entertain the delegates at a luncheon at Assiniboine Park on Friday, the 26th. On Friday evening the party are invited to a dance at the Royal Alexandra Hotel, the guests of the Canadian Pacific Railway.

The Winnipeg Tourist and Convention Bureau will entertain the newspaper men to an automobile drive and visits to interesting parts of the city during their stay.

On Saturday, June 27th, the delegates are invited to spend the week-end at Minaki Inn, the guests of the Canadian National Railways.

Cowboys Are Breaking Buffaloes To Harness

Will Be Driven Through Calgary Streets In Jubilee Parade

Calgary.—When the historical pageant, which will mark the fiftieth anniversary of the birth of the city of Calgary is held on the morning of July 6 this year, Calgarians and visitors to the city will see for the first time in history two full-grown Alberta buffaloes driven in harness through the streets of the city, attached to an appropriate cart.

The buffaloes have been shipped to J. M. Dillon, well known stockman of this city, by Oscar Duclos, of Edmonton, the packing plant magnate, and they are being broke to harness in this city by Harvey Shore and Bert Bishop. When first received several weeks ago, the buffaloes were almost unapproachable, but nothing daunted, the "cowboys" "cattle broke" them, and now they are being driven in harness and will follow any person who shows them a tin of oats.

Must Secure Game License

Foreigners Going Into Hinterland Must Pay License Fee to Hunt

Ottawa.—Authority to compel foreigners going into the Northwest Territories to pay a license fee is lavested in the Federal Government by a bill which was given first reading in the House of Commons.

The minister of the interior, Hon. Charles Stewart, explained that from time to time foreigners were entering the Canadian hinterland to explore and hunt game, and it appeared at present that the government had no authority to demand that such people take out a license. It was the intention to exact license fees hereafter.

Dirigible Badly Damaged

R-33 Will Not Fly For Some Little Time

London.—The dirigible R-33 will not be ready to take to the air again until the end of July, or early August, as she was damaged more extensively than was at first supposed, when she broke away from her moorings at Pulham in April.

Meanwhile, the R-36 is being prepared for a flight to Egypt and may perhaps be used for some of the trials in which the R-33 was to have been tested.

Ammunition For Afghanistan

Allahabad, India.—The Allahabad Pioneer states that 5,000 boxes of ammunition have landed at Karachi to be dispatched to Kabul, Afghanistan. Russian aeroplanes, pilots and mechanics have arrived at Kabul for the organization of an air force to prevent the repetition of the recent disturbances in the Kahost district of Afghanistan.

Named Army Chief

Berlin.—Miss Mary Booth, second daughter of Gen. William Bramwell Booth, has been appointed head of the Salvation Army in Germany, succeeding Commander Degrin.

Scottish Church Union

Edinburgh.—The general assembly of the Church of Scotland, by an overwhelming majority, carried a resolution approving union with the United Free Church.

Lorne A. Eedy, President of the Canadian Weekly Newspaper Association, and Editor and Proprietor of The Telescope, Walkerton, Ont., who will preside at the Convention, meeting in Winnipeg, June 24, 25 and 26.

Geologist Made Important Discoveries In West

Ottawa.—Dr. Donaldson Bogart Dowling, 67, explorer and geologist with an international reputation and responsible for the discovery of many coal and oil fields in Western Canada, died suddenly at his home here from heart trouble. Dr. Dowling entered the geological survey of Canada in 1884. He turned his attention to the study of coal and petroleum deposits of Western Canada, and was an international authority on this subject. His knowledge and advice was responsible for the discovery of an artesian water supply in Southern Alberta, making irrigation possible. As late as 1921 he made an examination of the petroleum discoveries at Fort Norman.

A New Industry

Manitoba Farmers To Go In For Hemp Growing

Winnipeg.—Hemp growing is likely to become a permanent industry among the farmers of the Portage Plains district. Various farmers have agreed this year to cultivate ten acres each, the total to be cultivated this year being 300 acres. The seed is being distributed.

The Manitoba Fibre Mills, Limited, are negotiating for tracksage, and it is announced that a hemp mill will be in operation by fall.

REDUCED RATES ON LIVESTOCK IS SUGGESTION MADE

Ottawa.—Dr. J. H. Grisdale, deputy minister of agriculture, advocated a $15 per head rate on cattle shipped from Canada to Britain, as compared with the prevailing rate of $20, before the special parliamentary committee on ocean rates. He thought $15 for a matured steer was a reasonable rate when prevailing prices were considered, and if lighter animals were carried five in a stall, the rate might be decreased.

"A reduction in the rate would open up a market, the value of which is scarcely calculable," the witness said. He compared the $7.00 cattle rate of some years ago with the rate prevailing today, and said that the present rate was making it difficult to build up the Canadian cattle industry. Not only would the Canadian cattle shipper benefit from a lower rate, but the steamship companies would be assured of regular cargoes, because of the development of the industry. There was practically an unlimited market for Canadian cattle in Britain, and, at present, space was inadequate.

To Ban Beer Ads

Ottawa.—On account of the resolution of indignation recently adopted by the Women's Christian Temperance Union in this city, the Ottawa Electric Railway has announced that all 4-4 beer advertisements would be removed from street cars at the expiration of the advertising contracts.

Acquiring B.C. Creamery Plants

Vancouver.—P. Burns, Calgary, head of P. Burns and Company, Limited, confirmed reports that the firm has under way negotiations with a view of acquiring co-operative creamery plants at Salmon Arm, Vernon and Armstrong, in the interior of British Columbia.

Canadians Get Honors At Yale

New Haven, Conn.—Four Canadians are among the 127 students who have been awarded fellowships and scholarships for graduate study at Yale University next term, including Carl Tolman, Vancouver, B.C.

BILL AMENDING THE INDUSTRIAL DISPUTES ACT

Ottawa.—The bill amending the Industrial Disputes Investigation Act, 1907 (the Lemieux Act) to bring it in conformity with the decision of the privy council was before the senate, passed through committee, and stands for its third reading without amendment.

Senator Beaubien raised the point of the liability imposed on employer and employee for a strike or lockout not in conformity with the law. He pointed out that in practice, at least, the penalty could be imposed upon the employee.

Senator Casgrain and Senator Reid also took the same position.

Senator Dandurand said the principle of equality of treatment of employer and employee was embodied in the bill. The act had proven so valuable that he thought every effort should be made to continue it as a medium for the settlement of industrial disputes.

Relief For Soldier Settlers

No Further Legislation In View Says Hon. J. A. Robb

Ottawa.—During the debate in the House of Commons on the resolution providing a credit to the account of any soldier settler whose contract with the government had not yet expired, or forty per cent. of the value of all livestock advanced and purchased before October 1, 1920, and 20 per cent. of the purchase price of all livestock in the following twelve months, J. H. Harris, Conservative, York East, stated that there seemed to have been no attention paid by the government to the question of relief in respect to the excessive cost of chattels to the soldier settlers. In one case where a soldier had paid $250 for a bay mare, ten years old and $35 for 25 hens, he thought that livestock at this price was rather expensive and asked what was the policy of the government in regard to affording relief in such cases.

Hon. J. A. Robb, minister of immigration and colonization, replied that he would have the case of the soldier settler referred to by Mr. Harris looked into, but that no further legislation is in view in regard to this matter.

Calgarian To Act On Fruit Control Board

Jobbers and Growers Agreed on Having a Committee

Calgary.—H. C. Stockton, of Calgary, president Western Canada Fruit Jobbers' Association, has been named by the jobbers as their representative on the committee of fruit and vegetables of British Columbia for 1925.

Other members of the committee have not been announced yet. The two members will be representative of the Associated Growers of British Columbia and of the shippers of that province.

This committee was agreed upon at a meeting of the jobbers and growers in Winnipeg, and again at Vernon, when the jobbers and growers met with the shippers.

Bankruptcy Act Amended

Bill to Aid Insolvent Farmers Given First Reading

Ottawa.—An amendment to the Bankruptcy Act to enable the provinces to appoint official custodians to administer the estates of insolvent farmers and to enable such farmers to carry on work after having been declared bankrupt, was introduced in the House of Commons by Hon. Ernest Lapointe, minister of justice. The amendment, as introduced in the commons, has been passed by the senate.

The minister said that the proposals were enforcing the recommendations of the banking and commerce committee of last year. The matter had been urged for some time by Saskatchewan and Alberta members of parliament.

The bill was given first reading.

Motor Boat Beats Train

New York.—Gar Wood, world motor boat champion, defeated the Twentieth Century Limited in a dash from Albany to New York, May 25. The distance covered was approximately 150 miles. In 1921, Wood defeated an express train from Miami, Fla., to New York.

Wins Medal At McGill

Montreal.—Many westerners were among the students graduating at McGill University, May 25. A British Columbian, T. H. John, of Victoria, won the Stevenson gold medal for dentistry.

illiteracy in Canada

By Marjorie Bradford, Social Service Council of Canada

To provide educational facilities in the frontier settlements of Canada, the minister of education in Saskatchewan has recently announced the decision of his department to establish the "Outpost Correspondence School" for the purpose of serving children who live beyond the borders of organized school districts. This will do much to relieve the minds of parents who are pioneering in remote districts and whose ordinary hardships are sufficient price to pay for the new home in a new land. These children need not be deprived of at least the elementary education which is so necessary to their happiness and success in life.

Unfortunate illiteracy in Canada is not confined to its frontiers and newer territories. Defining illiteracy as inability after the age of ten years to read or write in any language, an analysis of the census statistics of 1921 shows that 5.10 per cent. of Canada is illiterate. Of the provinces, Ontario has the lowest illiteracy, 2.96 per cent.; and New Brunswick tops the list with 7.81 per cent. Illiterate Manitoba comes second to New Brunswick with an illiteracy of 7.09 per cent. In that province the high percentage is due in great measure to the large immigrant population in which illiteracy is much higher than among Canadian-born. Of the foreign-born in Manitoba 29.72 per cent. are illiterate. In the three western provinces there are 68,636 illiterates and of these 81 per cent. are foreign-born and 19 per cent. Canadian and British-born—a condition which should make us, as Canadians, think. Compulsory education laws are doing much, but in spite of these, many Canadian-born children of foreign parentage as well as many children of Canadian illiterate parents are perpetuating their family names in the ranks of illiteracy. For instance, 39.16 per cent. of foreign-born Ukrainians in Canada are illiterate and 7.65 per cent. of their Canadian-born children can neither read nor write! Illiteracy, however, must not be confined with inability to speak English. This is another problem and a serious one. In Saskatchewan alone over 49,000 citizens cannot speak English.

The economic waste and the dangers of illiteracy in a democratic country are self-evident. Henry Van Dyke says, "To place the ballot in the hands of illiterate people is like *hanging a diamond around the neck of a little child and sending it out into* the crowded street." Two million illiterates vote in the United States and two hundred and fifty thousand are eligible to vote in Canada.

A much lower urban than rural illiteracy in Canada, even among foreign-born, demonstrates the excellent work that is being accomplished by night schools. It is evident that we need many "outposts" if we are to deal with this vexing problem.

The Craftiness Of Foxes

Devise All Kinds of Schemes to Escape Hounds

Most hunting enthusiasts have stories to tell of the craft of foxes. Foxes have been known to climb trees in order to escape the hounds. During the past season the famous Grafton hounds "found" in a spinney. The fox bolted and, with a good lead, headed straight for a field in which was a large flock of sheep. He deliberately threaded his way in and out among the startled sheep, disappeared through a hedge, and was lost to view. When hounds arrived, the sheep smelling of fox and the fox smelling of sheep brought them to a complete standstill, and Reynard lived to run another day.

Who Won?

College Man.—"Would you object if I kissed you?"

Co-ed.—(No answer.)

C. M.—"Would you care if I kissed you?"

Co-ed.—(No answer.)

C. M.—"Would you mind if I kissed you?"

Co-ed.—(No answer.)

C. M.—"Say, are you deaf?"

Co-ed.—"No, are you dumb?"

A Better "Break"

"Bobby," said the teacher, sternly, do you know that you have broken a Commandment by stealing James' apple?"

"Well," explained Bobby, "I might just as well break one and have the apple as break another and only covet it."

Sugar For Vegetables

It may be useful to know that French cooks add a teaspoonful of sugar to each quart of water in which peas, marrows and other green vegetables are cooked. This brings out the flavor of the vegetable and is very agreeable especially in very young peas, which the French cook.

Leave It To The Admiralty

Sailors of All Nations Take Their Troubles to Court in London

It is not generally known that sailors of every nationality bring their grievances to a court in the block of buildings known as the Law Courts in the Strand. This is the "Admiralty Court," over which presides a president and two Trinity Brethren, and it deals with cases of collisions between vessels in any part of the world or of any nationality; the assessing of damages for such collisions, arbitration in connection with towage of a valuable cargo, and—even disputes between the captains of two foreign vessels.

When a ship of any nationality is disabled at sea, and another comes along to help, the captain of the disabled vessel may ask what the other will charge to tow him to the nearest port. The reply often is, "leave it to the admiralty," meaning the court situated in the Strand, London.

One reason for this general confidence of sailormen in the Strand justice house is said to be the absolute impartiality dealt out there. Also the two Trinity Brethren who sit with the judge have been masters of ships for many years, and can talk freely with the contestants in their own tongues and in their seafaring lingo.

War Playthings Are Again In Demand

Knights of Twelfth Century Take Place of Soldiers

Medieval knights in shining armor have taken the place of the little tin soldiers which were popular in England prior to 1914. After the war toy soldiers all but disappeared from the shops, not only in England, but in many countries on the continent, particularly Germany and Austria, and in their stead came little farmer boys and other loaded figures of agriculture.

Models of cows and horses, ducks and chickens and farm houses to scale have been displayed quite generally. Hunting scenes, with the huntsmen in bright colors on horses, foxes, hedges, ditches and other suggestions of the country have also been on display this spring on a larger scale than heretofore, but the demand of the public for the knights suggestive of the troublesome days of the twelfth century, indicates, says the toy dealers, that war playthings are again coming into favor.

Accuracy Did Not Count

Mongolian Prince Wanted Map To Show Large Country

An amusing story is told in Berlin by a publisher of geographical maps. A Mongolian prince recently visited Berlin to place an order for maps of his country. The publisher was glad to get the order, but told the prince that the latest maps he had were published before the war.

"I must confess," said the publisher, "that I don't know the exact boundaries of your country at present. Haven't you some material that will tell you how to draw the boundary lines?"

"No, I haven't," was the reply. "But it doesn't matter. Just you draw the boundaries as wide as possible, so that my people may see how large their country is."

Had Become Monotonous

Small Girl Wanted a Change In Her Prayer

Betty had only lately been instructed in the matter of evening prayers, and her performance was exemplary until the occasion when she startled her mother with the petition: "Bless Thy little pig tonight."

She was reminded that the correct word was "lamb," but refused to return to orthodoxy.

At last, when pressed for the cause of this stubborn naughtiness, she replied that she was tired of being a lamb. "Every night," she protested, "it has been lamb, lamb, lamb! So tonight I'm going to be a pig, and tomorrow night I am going to be an elephant."

The Hotel Bill

Visitor.—Go to the proprietor and tell him to make my bill out properly, and write "omelette" with two "l's" and not one.

Waiter (a few minutes later): It's all right now, sir—omelet. 1s.; two teas, 2s.

"Now suppose," said the official who was examining the chap who wanted to be a life guard, "that a girl went over her head and couldn't swim. After rescuing and reviving her what would you do?"

"Get her a vanity case," replied the applicant.

"When shall I take these pills, doctor?"

New M. D.—"An hour before you feel the pain coming on."

Crown Jewels Worth Millions

Owned By State and Always On Exhibition to Public

Queen Mary wore $1,000,000 worth of jewels, all diamonds, at the first of the season's courts, at which 800 neophytes were presented to their Majesties.

On her brow reposed the diamond crown, including the Kohinoor diamond, removed for the occasion from its glass and steel-cased vault in the Tower of London. Her gown was of shimmering silver.

The crown jewels, including scepters and many pieces not a part of the crowns themselves, do not belong to the reigning family, but to the state. Except on ceremonial occasions they lie exposed to public view in the Tower, guarded by the quaintest figures in British public life, the red-garbed Beefeaters.

Was Diamond Princess

Viscountess Lascelles Born Just Before Queen Victoria's Jubilee

Princess Mary (Viscountess Lascelles)—who celebrated her 25th birthday recently, narrowly escaped having her age denoted in her name. "My dear little Diamond Jubilee Baby" Queen Victoria called her because of her arrival just before that famous celebration, and King Edward for the same reason desired to have her named "Diamond." After due consideration, however, this was considered too great a departure from tradition in royal nomenclature, and the Princess was Christened Victoria Alexandra Alice Mary.

Swiss Mountain Roses

Roses From Swiss Alps To Be Planted At Banff and Lake Louise

An effort will be made this year to transplant Swiss mountain roses in the Canadian Pacific Rockies. These roses, which were brought from Switzerland by Dr. Huebacher, late Swiss consul at Montreal, are extremely hardy and only thrive above elevations of 3,000 feet. The initial plantings will be made in the gardens of the Canadian Pacific hotels at Banff and Lake Louise.

On the Swedish state railways conductors must be able to speak three languages.

Boarding houses are intended to convince bachelors that they should have homes of their own.

The government of Jerusalem has issued a decree that all automobile horns will be replaced by bells.

Village Run By Ex-Soldiers

Picturesque English Town Training Centre For Disabled Men

In the beautiful New Forest of Hampshire, England, there is a picturesque little village whose inhabitants consist entirely of ex-service men and their families, says a London paper.

The name of the village is Enham, and until the end of the war it was merely a typical old-fashioned country place of thatched cottages and little gardens.

After the armistice, however, some ex-officers decided to try an interesting experiment and establish a training centre at Enham for disabled soldiers. They acquired some of the little cottages in the village and brought down ex-service men with their families to live in them.

Experts in furniture making, basket-work, and other industries were then obtained to instruct the men, and before long quite a considerable output of furniture and wickerwork was coming from the Enham centre.

Within the settlement now is a completely equipped farm run entirely by ex-service men. The village contains a central bakery, a butcher's shop, and even a power house which supplies the centre with electric light and heat.

Credit Given To Frenchman

Jacques Garnerin Was Inventor of Parachute 132 Years Ago

The Royal Air Force today is using a parachute perfected by an American, which fact has brought out comment and discussion as to the history of the use of parachutes in aeronautics.

The assertion is made that the first lifesaver of this kind was conceived 132 years ago by Jacques Garnerin, a Frenchman. He worked out the idea while a prisoner of the Germans in the Ehrenbreitstein fortress, at Coblenze on the Rhine, and with a parasol-like contrivance dropped safely from the fortress walls to liberty.

Thus convinced that his theory was sound, Garnerin, once back in France, perfected his mechanism and, using a parachute built virtually along the lines followed today, in 1799 made a successful drop from a balloon from a height of 3,000 feet.

Tramp.—Pardon me, sir, but have you seen a policeman round here?

Polite Pedestrian.—No, I am sorry.

Tramp.—Thank you. Now will you kindly hand over your watch and purse?

The Power Of Example

Beautiful Italian Statue Had Great Influence Over Street Waif

A beautiful statue once stood in the market place of an Italian city. It was the statue of a Greek girl. A ragged, uncombed little street child, coming across the statue in her play, stopped and gazed at it in admiration. She was captivated by it. She gazed long and lovingly. Moved by a sudden impulse, she went home and washed her face and combed her hair. Another day she stopped again before the statue and admired it, and she got a new idea. Next day her tattered clothes were washed and mended. Each time she looked at the statue she found something in its beauties until she was a transformed child.

Round-up At Dartmoor

Ponies Run Loose In Summer and Are Collected In Fall

The nearest approach Great Britain has to a wild west round-up is the annual gathering in of Dartmoor ponies and horses which have been allowed to run loose during the summer. It is not advertised, as the operations are intended to be a surprise for the owners of the ponies. One object is that the collection of grazing fees due to the moormen and the taking to task of owners who have no grazing rights; another is the branding of the foals. The ponies are rounded into a "drift-field" by a posse of riders, and when several branded are collected there is a lively scene as they are sorted out.

Finders Are Not Keepers

Not Trying to Find Owner is One Form of Stealing

Do all our readers know that it is the legal duty of anybody who finds an article of any kind to advertise the same at once? Some people fancy that by holding a thing without saying anything about it for an indefinite period, such article becomes their own property, if for some reason the lawful owner has not advertised his loss. That is a wrong idea. It is only after an article has been legally advertised, and the owner fails to turn up, that the finder has the right to possession.—Walkerton Telescope.

Movies For Air Passengers

In the future, aeroplane passengers who become bored while flying may be able to take in a movie during the voyage. One of the large Paris-London air expresses was recently supplied with a movie picture projector, and, during a trial flight, a film was flashed on a screen inside the cabin, with 12 passengers as spectators.

Chu Chin Chowesses From China

These young people have just returned from a trip around the world on the Canadian Pacific S.S. Empress of France. Among other places, too numerous and difficult to spell to be mentioned, they visited China. They were so impressed with the scenery there that they brought some of it back with them and here they are seen in their mandarin costumes, purchased, with the help of several interpreters, guides and arbitrators in the bazaars of Peking.

Those in the big pictures, reading from left to right (standing) are Miss Kathryn Little, New York; Miss Hazel Taylor, Belleville, Ont.; Miss Mary Kurt, Kansas City; Miss Edna Hewlit, Chicago; Mahlon Hutchison, Jr., Devon, Pa.; George Fulford, Brockville, Ont.; Mrs. Henry Price, Buffalo, N.Y.; Miss Ethel Morrow, Paducah, Ky.; Mrs. Ira Smith, Providence, R.I.; Miss Aileen Hall, Winnipeg, Man. (Sitting) Miss Marjorie D. Martin, Winnipeg, Man.; Miss Bettina Clark, Chicago; Miss Lorraine Clark, Chicago; Miss Ursula Burns, New York; Mrs. T. C. Desmond, New York; Miss Betty Fulford, Brockville, Ont.

In spite of any contrary impression given by the smaller picture there is really no shortage of chairs on the France, it is simply that the playful little ladies wanted to test the capacity and power of resistance of a chair before recommending a substantial friend of theirs to recline in it. Their names are, reading from left to right: Miss Hazel Taylor, Belleville, Ont.; Miss Ursula Burns, New York; Miss Mary C. Kurt, Kansas City; Miss A. Hall, Winnipeg; Miss B. Clark, Chicago; and Miss Betty Fulford, Brockville, Ont. They enjoyed themselves so much they are firmly determined to induce their friends to join the France when she makes her Mediterranean trip in February, 1926.

(1) A bunch of American and Canadian beauties decked out in Chinese finery. They are back from a tour of the world.

(2) Pity the poor chair! These dainty travellers have seen what the world looks like and are enjoying the last few days of their holiday on board before going ashore.

Canadians Should See Canada First

Greatest Variety of Scenery in World Says Dr. Doolittle

Canadian scenery is abundantly worth seeing and admiring, thinks Dr. F. E. Doolittle, who is widely known as an advocate of good roads and that sort of thing. Last summer he made a complete motor trip from coast to coast covering as much of the distance possible on Canadian soil, under varying conditions. In a recent address in Toronto he said that while there are still obstacles in the way of a cross-country auto trip the theory that Canadians should "see Canada first" still holds good, and he felt that anyone acting consistently on that slogan would discover that there is a greater variety of scenery in Canada than is to be found in any other part of the world. Even the Canadian Rockies are much more scenic and impressive than the mountains in the states. As an illustration, he recalled that the highest point he touched on any roadway in Canada was at 4,500 feet in the Cascades, and there the mountains rose for thousands of feet on either side and the scenery was majestic. Then on his way home he followed the Lincoln highway through the American mountains and though he reached the height of 8,325 feet, it would need a sign to tell him that he had reached a Great Divide. The scenery was in no way comparable with the Canadian, and Dr. Doolittle was confident that if the great travelling public across the line could be made to appreciate the beauties and advantages of Canada, they would flock to this country in such numbers each summer that shortly the balance of trade would be all in Canada's favor.—Edmonton Journal.

Was Mythical Character

Old Legends Say Sweeney Todd Was London Barber

A report to the effect that the house on Fleet Street, London, formerly occupied by Sweeney Todd has been discovered gives rise to the question, "Who was Sweeney Todd?" He is rather a mythical person and his existence is accounted for largely by unproven legends. The story goes that Sweeney Todd was a barber of Fleet Street, who had an unpleasant way with customers. For, according to tradition, if nervousness came over a shaver who looked worth robbing, he would seat this man in a chair which would presently capsize and throw the occupant into a well or vault below. There, it is said, he would rob the unfortunate fellow and afterwards dispose of the body to a confederate who kept a pie shop in the adjoining house, whose bakehouse communicated with the vaults of St. Dunstan's Church. While the legends say that Todd was hanged at Tyburn, the annals of Newgate have nothing about him. But Sweeney Todd was sufficiently famous to figure in many old ballads and melodramas.

Making World Appear Brigh.

Everything Can Be Disfigured By a Person's Outlook

"Suppose you look at the world through a yellow pane of glass," said the late beloved Dr. Jowett. "Why, then you have a yellow world. Suppose you look through a dirty pane of glass.—Why, then everything is defiled. Suppose you look at everything through the yellow pane of jealousy, or the red pane of envy—why, then you disfigure everything. And if you look at things through a soured disposition you will not see anything that is lovely or sweet. The cynical heart has a charmless world."

Cattle Fight For Leadership

Alpine Cows Give Yearly Exhibitions Of Strength

Alpine cows in the canton of Valois, Switzerland, recently had their annual fights to determine which shall lead the herd until next fall. The successful cow in each herd carries a bell around her neck as the symbol of leadership. Next year the "queen" will have to fight two or three selected young cows to retain her title. The custom is observed with picnics, at which the Alpine villagers watch the fights. The cows are not injured, as the fights are merely exhibitions of strength.

Enough to Get Married

Tydeman.—I wish I had enough money to get married.

Climpson.—What would you want to do that for?

"I wouldn't. I'd buy a car."

A Chicago professor is trying to find out if the length of a man's legs has anything to do with the activity of his brain. Some men have little to do in this world.

Most people are willing to do their duty—as they see it.

Dominions Urged To Spend Entire Allotment Provided By Britain for Emigration

The overseas settlement department of the colonial office has issued a message written by J. H. Thomas, who was secretary for the colonies in the Ramsay MacDonald cabinet, and addressed "To my fellow citizens in the dominions and Great Britain." Dealing with the capabilities of the dominions and the smallness of their populations, he expressed himself at length on the latter problem and asks if the British people do not see that the existence of dominions as nations depends upon having them populated to a much greater extent. Canada, he says, must have more people, and five or six millions of British could not hold Australia. The success of the white Australia policy depends upon having more inhabitants.

Mr. Thomas states "that those empty lands are a danger to us all," and, in connection with their development and settlement, shows that under the Empire Settlement Act the British treasury can put up £5,000,000 annually, but that not more than one-sixth of this amount has been spent yet in any year. He urges the people of the dominions to get together and find some means of spending this money and more, if necessary. He declares that migration must be encouraged upon broader lines and questions whether it is enough to only encourage a man who is prepared to work as a farm hand and a woman as a domestic servant. He suggests that family groups be established upon a far larger scale, and even villages formed with others, besides land workers, included. He also asks if more opportunities in business could not be found for young men trained in the avocation of the city.

Home Market For Pork

Striking Example of the Purchasing Power of the Canadian Public

Canada, says the markets intelligence division of the Dominion live-stock branch in its annual review of the situation in 1924, increased her exports of bacon and other pork and pork products by 24,562,100 pounds, the total being 128,150,000 pounds compared with 103,548,000 pounds in 1923. The increase in exports does not represent the augmentation of hog supplies, since the surplus of hog marketings over the previous year was equal to about 80,000,000 pounds. As a consequence domestic inquiry must have absorbed 57,500,000 pounds, more pork and products in 1924 than in 1923. As the review says—a striking example of the purchasing power of the Canadian people!

Analysis Of Feeding Stuffs

Importance of Using Only Tested Preparations For Feeding Livestock

There are at present on the market a number of high-priced feeds, mostly the by-products of packing houses, slaughter houses and canneries, and including meat and blood meals, tankage, bone meal and fish meals. A new bulletin, No. 49 of the department of agriculture, prepared by Dr. Frank T. Shutt, Dominion chemist, and Miss S. N. Hamilton, assistant chemist, gives for the first time in Canada, an analytical survey of these materials. The composition of a large number of samples is given in detail. She authors stress the importance of making certain that these feeding stuffs are sound and wholesome and free from any taint of rancidity and decomposition. They should be purchased only on guaranteed analysis.

Five Million Trees

Distribution of Seedlings and Cuttings From Government Nurseries

The twenty-third annual distribution of seedlings and cuttings of trees for shelter belts and windbreaks planting in the prairie provinces has been completed by the Dominion forestry branch from their nurseries at Indian Head and Sutherland. The Sutherland farm this year established a record of 2,600,000 being shipped to 2,050 applicants. The forestry station at Indian Head shipped 2,400,000 trees to 2,555 applicants, making a total shipment of five million trees.

Mr. Thickedd: "When I read about some of these wonderful inventions in electricity it makes me think a little."

Miss Smart: "Yes, isn't it remarkable what electricity can do?"

"Green makes dark women attractive." Long green makes any of them attractive.

When a man can't do anything else he can develop into a chronic kicker.

Natural Resources Bulletin

Canada of the Future to Become the Granary of the World

The natural resources intelligence service of the department of the interior at Ottawa says:

Canada's crops are now in the ground, and the annual question, "what will the harvest be?" must remain unanswered for some months. The result will now depend upon Nature. Sunshine and moisture have the final say as to the outcome, and in this connection it is well to recognize our dependence upon forces entirely beyond our control.

Canada, fortunately, is blessed with a climate that produces the very best of staple food supplies and that can be depended upon. It is well for the world that such is the case, otherwise many countries would be hard pressed for enough to eat. Canadian wheat in its raw state is now going to 26 individual countries, while Canadian wheat flour is being used upon the tables of the people of 62 countries. Canadian oatmeal and rolled oats are going to 20 countries, while meats of all kinds are being provided for a great many populations.

Canadian farmers have a responsibility which has probably never before been placed upon the shoulders of any group of men. The United States has practically ceased as a wheat exporting nation, and the eyes of the world are being directed to Canada. We have the land, we have the climate, and we have the men with the ability and will to meet the demand, and within the next few years this country will occupy a position never before occupied by any country. Instead of being, as it now is, the "granary of the empire," Canada will be the granary of the world. With the advantage of a beneficent nature and the aggressiveness and energy of Canadian farmers, Canada, as a world supplier, will make good.

Nature Cannot Protect Forests Against Fire

Thorough-going Conservation Scheme is Great Need of Dominion

Not many weeks ago one would have thought that forest fires were about the last things Albertans needed to worry about. With every hollow full of water and the earth soaked as it has not been in spring time for many years, the prospect was for a summer when fires would cut little or no margin off the gross value of our forest lands.

But already the fire rangers are sounding warnings that in the timber tracts the conditions for devastating conflagrations are almost ideal. The moral is that we cannot leave it to nature to protect the forests against fires—or other enemies. That will have to be done by human brains and brawn. The job will cost money but we cannot afford not to spend it. A thorough-going forest conservation scheme is one thing the province—and the Dominion—must have.—Edmonton Bulletin.

Benefits Of Sheep Dipping

Contrasting the Results Between Dipping and Not Dipping

A livestock branch sheep promoter in Western Ontario who had taken an active part in installing community sheep dipping tanks, tells an interesting story of the experience of a group of sheep men for whom one tank was installed. These men were not very enthusiastic about sheep dipping, and the second year neglected to put their sheep through. The one season's experience, however, had enabled them to contrast the results between dipping and not dipping. The next year every man of them came back thoroughly convinced that no branch of the farm work was more important than the annual dipping of the sheep, which produces a better and more valuable fleece, a more contented and therefore better doing crop of lambs which finish readily for the market.

Will Not Extend Time

The British Government has informed Bulgaria that it does not consider it necessary to extend the time within which Bulgaria may use a temporarily increased militia force. This increase was authorized by the allied council of ambassadors at Paris in order to permit Bulgaria to cope with the recent disturbances in that country.

Scotsman's Bad Luck

A Scottish visitor in London heard it was good luck to throw a sixpence into the Thames, but found out that it wasn't quite so, because the string he had on the coin slipped off.—St. Catharines Standard.

Success For Honest Worker

Hebrideans Better Off In Canada Says Bishop of Argyle

"No honest, hard worker need fear of failure in Canada," said Dr. Donald Martin, Bishop of Argyle and the Isles, who passed through Montreal recently enroute to Scotland after a six months' tour of Canada and the United States, during which he visited the Hebridean colony established at Red Deer, Alberta, in 1923.

"Canada is a new and growing country," the bishop said, "and while life for the settler is still more or less crude, I was pleased to see the way my former parishioners had taken hold in their new walk of life. With the exception of a few of the older members of the colony, who suffered somewhat from homesickness, and are too old to take root in a new country, I found them all satisfied with the change. They are decidedly much better off in Canada than in Scotland.

Increase In Trade

Big Increases Reported In Many Lines Of Trade

Canada's trade was ten million dollars greater in April, 1925, than in April last year, and the increase was chiefly in exports. A recapitulation of exports and imports for last month shows that Canada exported goods to the value of $59,909,377, and imported $59,104,651.

In April, 1924, exports were $48,880,-914, and imports $60,173,141.

Exports of agricultural and vegetable products were up six million dollars and of animals and animal products increased about two million dollars. There was also a big increase in exports of metals as compared with April, 1924.

Shipbuilder Is Optimistic

In twenty years' time, passengers who wish to cross the Atlantic speedily will do so by airship or aeroplane, in the opinion of Sir Alfred Yarrow, English shipbuilder, who addressed the members of the Quebec Rotary Club recently.

Appropriate

Grandpa.—What is the name of the young man that calls to see May?

Betty.—We call him April Showers.

Grandpa.—"April Showers? Why?"

Betty.—Because he brings May flowers.

Not Such A Disadvantage

Young People From Farm Are Successful in City

We farmers have been led astray in this matter of schooling by a lot of sealots. We read frequently that the education of the country child is inferior to that of the city child. The reformers who state this—people for the most part interested in education as a commercial proposition—point to the one-room school, the poorly paid teacher, and the short school-year. However, they do not try to prove that the children who have remained on the farms have ever fallen down on the job of production or that those who have left have been unable to compete successfully in business or professional work. Some of our reformers forget the advantages of disadvantages. —Glenn Birkett in the Atlantic Monthly, Boston, Mass.

Saskatchewan Dairy Products

Estimated Value of Last Year's Production Placed at $19,577,688

The estimated value of the dairy products of Saskatchewan for 1924 is $19,557,688. The principal products making up the total were 13,583,905 pounds of creamery butter valued at $4,550,607; 19,250,000 pounds of dairy butter, value $4,256,000; ice cream 243,924 gallons, value $453,067; milk sold for consumption 32,400,000 gallons, value $3,160,000, skim milk fed to calves 9,429,550 gallons, value $1,-887,910. The estimated value of poultry and poultry products of Saskatchewan in 1924 was $9,441,585.

Pelican Flower Is Peculiar

Native of West Indies Has Been Made to Bloom in U.S.

The first pelican flower to be raised in a United States nursery is now blooming in the Botanic Gardens at Washington. This bloom of the vine aristolochia is also known as the goose flower. The vine is native to the West Indies, and the feat of making it bloom represents ten years of effort by the director of the garden. The head and back of a duck appear outlined in white, life size, in this peculiar flower, which is purple within.

A wealthy and eccentric Scotchman set aside $500 in his will for the erection of a monument to the memory of his favorite cat.

Summing Up All The Good Things Trees Will Do For The Prairie Farmer

(By Archibald Mitchell)

In these days when a radical change is developing in farm practice on the prairies, when we are beginning to desert the old risky annual adventure of straight wheat growing for the safer methods of modified summerfallow, corn, sunflowers and stock, there is nothing of more interest and importance than the growing of trees on the farm.

Have you ever stopped to sum up all the good things trees will do for the prairie farmer? In the first place they make his place noticeable, not a person passing, be he neighbor, tourist, immigrant or prospective buyer, but will see it from even miles away. Trees are the most conspicuous landmarks anywhere on the prairie, and planted farms always catch the eye. Passersby may miss the condition of the soil or the crops or the buildings or the fences, but they never fail to comment on the plantations they see. These make an impression that is never forgotten. Trees create an attraction and a value you get in no other way and one that is most important for it must be remembered that it is not you that puts the final value on your place, it is the stranger or the purchaser and as he sees it, so will stand his estimation of your property or your district. The farmers' plantation is a wonderful creator of value.

Then close in you find the trees even more of an advantage than at a distance. The impression they give of comfort and substantiality and of the houliness so distinctive and so dear to every family make them an asset or which no one can estimate the value. To the farmer himself and his family living there, the benefits are quite material, for they have shelter from the winds and shade from the sun in summer and the fiercest cold blasts of winter pass them over. Many a time in winter they do not realize it is cold enough for an overcoat until they get outside their own gate and away from the shelter of the trees. Fuel coal bill is lessend, for the constant steady stream of cold air has not to be contended with, which makes a great difference in maintaining the temperature indoors. Then there are the material advantages arising from a good *garden which invariably follows the shelter belt. Abundance of the finest* kind of vegetables, small fruits and even large fruits, for rarely do you find a three or four-year-old plantation that is not sheltering the first beginnings of an orchard of apples, crabs and plum trees. The soil invariably follows the other and no successful fruit growing has yet been recorded from the prairie unless from behind the shelter of a tree belt.

Seek Settlers From U.S.

A United States Emigration Branch Established at Ottawa

Although considerable public attention has recently been directed to the policy of the Canadian Government in encouraging British families of farm experience to settle in Canada, not so much is known of the work being carried on by the Canadian department of immigration and colonization in the United States. Nevertheless it is recognized that American farmers, who have had agricultural experience under conditions very similar to those which prevail in Canada, are among the most desirable classes of new settlers, and an aggressive campaign is being carried on to increase the number of farmers coming from the United States to Canada.

For the better promotion of this work there has recently been established in Ottawa a United States emigration branch, which is under the direction of J. Bruce Walker, an official of many years experience in immigration and colonization work on behalf of the Canadian Government. The offices of the United States have been entirely re-organized and their efforts very considerably speeded up.

Swiss Bought Canadian Wheat

202,000 Tons Were Imported From Canada Last Year

Canada supplied Switzerland with most of its imported wheat in 1924. The annual figures show that Switzerland herself produced 45,646 tons of wheat, nearly 50 per cent. less than in the previous year, whereas the wheat consumption amounts to nearly 420,000 tons a year. Switzerland imported 377,000 tons mostly from Canada (202,000 tons); from the United States, 158,000 tons; and from Hungary, 12,300 tons; while 8,505 tons were imported from Russia by intermediary means.

The number of well known women writers is slightly greater than famous men writers.

MOUNTAINS TEMPT LOVER OF OUTDOORS

One of the finest Alpine territories to be found anywhere on the North American continent is that surrounding Mount Robson (13,068 ft.), highest peak in the Canadian Rockies. Here the visitor finds magnificent peaks, awe-inspiring glaciers and delightful Alpine valleys with their magnificence of wild flowers to charm the heart of the nature lover. In 1924 the Alpine Club of Canada held its annual camp on the shores of Berg Lake, shown above, and members of that organization, many of whom have climbed in different parts of the world, were unanimous in declaring that Canada held no more splendid Alpine and scenic territory than this.

Nor is it necessary that the visitor be an experienced Alpinist to enjoy the beauties of the Mount Robson district, for there are within a short distance of the Berg Lake bungalow, splendid peaks which are easy enough in ascent for the tyro and yet offering splendid views of the surrounding Alplands.

The photograph shows Mount Robson, the monarch of the Canadian Rockies, and Berg Lake, so named because of the icebergs which are constantly floating on its surface. Beneath is one of the Swiss guides from Jasper Park Lodge, coiling his rope in preparation for leading an ascent on Mount Robson, while to the right he is shown making his way round one of the difficult ice peaks of the climb.

Ponies and guides are available at Mt. Robson station to conduct tourists from there over the magnificent Robson Trail to Berg Lake, where comfortable bungalows are maintained, which provides an excellent starting point for many wonderful excursions into the higher passes.

Moon Farming

Survival of Early Belief About Effects of Moon on Growth of Plants

Some time ago the Union printed the fact that an English scientist, a woman, had proved by long experimentation that the moon had a strong influence upon the germination of seeds and that the belief that seeds should be planted in the coming of the moon rested upon a scientific basis. For decades our farmers have been derided for their belief in the potency of the moon. The end sought could be reached by exposing seeds to moonlight before planting. Now we are informed that the state of the moon governs the destructive chilling and the freezing of fruit crops.

When fruit trees and shrubs blossom in the light of the moon, they survive any subsequent frosts. But if they blossom in the dark of the moon the fruit does not stand frosts. The dark of the moon produces weakness in the blossoms, while the light produces waxiness and so the subsequent crop is fortified against any but the heaviest frost.—Manchester Union.

A Poor Hiding Place

Merchant Finds Wastepaper Basket No Place to Put Money

Joe La Mantia, a Strathroy, Ont., fruit merchant, had an expensive accident recently. He placed his cash, some $280, in an envelope and dropped the envelope into a wastepaper basket in his store for safekeeping over the weekend.

He never thought of the money at anytime while he was in the store during the first part of the week. When he went to get it he discovered, to his horror, that the contents of the basket had been burned by his clerk in tidying up.

About $20 in silver was salvaged from the ashes, but the bills were a total loss.

There are more than 50,000,000 "untouchables" in India, to speak to whom is to lose one's caste.

WORLD HAPPENINGS BRIEFLY TOLD

Lieut.-Colonel C. A. Repington, noted war correspondent and writer on military subjects, died of apoplexy at Hove, May 25.

An agreement has been reached by the French Government and the opposition in the senate, whereby the French embassy at the Vatican will be maintained.

The King has appointed the Duke of Northumberland a Knight of the Garter, filling the vacancy caused by the death of Marquis Curzon, of Keddleston.

A bill amending the Railway Act, 1919, and designed to prevent the transportation of liquor by false billing, received second reading in the house.

The right of the Crown to appeal in criminal cases will be restored if amendments to the Criminal Code, introduced by the minister of justice, are made law.

The bill to confirm a trade agreement between the Canadian Government and that of the Netherlands has been given third reading and passed final stages in the house.

Marshal Joffre, accompanied by members of his staff and a detachment of troops, attended the funeral of the Earl of Ypres. Services were conducted at Westminster Abbey.

There is an agitation in Ulster to induce the Northern Government to proclaim the twelfth of July a "dry day," following the example of the Free State in prohibiting the sale of liquor on St. Patrick's Day.

Dr. Donaldson Bogart Dowling, 67, explorer and geologist with an international reputation, and responsible for the discovery of many coal and oil fields in Western Canada, died suddenly at his home in Ottawa.

The Imperial Government has accepted the invitation of the New Zealand Government to participate in the international exhibition in New Zealand next November. It is also hoped to arrange for a British exhibit in the art gallery.

Memorials to Karl Marx, the German Socialist, in the shape of tablets to be affixed to houses which he occupied in London, have been banned by the museum's committee of the London county council. The committee rejected the proposal that such memorials should be erected.

Wireless In Far North

North West Territories and Yukon Station Will be Erected at Aklavik This Summer

It has been decided to establish the most northerly main station of the North West Territories and Yukon Wireless System at Aklavik in the Mackenzie River delta. Aklavik is more than 2,000 miles north of Edmonton by the regular travelled route, and is the terminal of the Mackenzie River navigation and the northern winter mail service. Accessible to the inhabitants of the Arctic coast in summer and winter, it has become the centre of the fur trade from Coronation Gulf to the Alaskan boundary.

The Royal Canadian Corps of Signals in co-operation with the North West Territories and Yukon branch of the department of the interior will establish the station this summer. At Herschel Island is the customs and immigration port for ocean vessels coming from Alaska, a sub-station will be installed there and operated during the season of open navigation.

Not A Pleasure Trip

Tours of Prince of Wales Are Very Tiring

It is said that this official tour may be the last the Prince will make. When he returns he will have seen practically the whole of the British Empire—certainly far more of it than any other member of the royal family. He will be equipped then with the intimate knowledge of the many lands under the flag, and with first-hand information of the needs and conditions of many different peoples. The untravelled little busybodies who regard every tour the Prince makes as a glorified joyride—expensive and unnecessary—will do well to remember that these journeys are conditioned by ceremony and official business. The Prince has not set forth on a pleasure trip—but on what will be a very fatiguing journey of Imperial duty.—London Daily News.

Modern Advertising

One of the principles insisted upon by the exponents of modern advertising is that truth is more potent than deceit. First, the advertiser ought to have something worth selling; then his business is to let people know about it and to show how it is in his power to serve them to advantage.—Hamilton Herald.

Knew About Jutland Plans

Britain Informed About Battle and English Fleet Moved First

Prof. Bernard John Wilden-Hart, who has made military intelligence in Europe a study, in a lecture before members of the Liverpool Geographical Society, asserted that for several years before the war Germany had 8,000 spies scattered at various points between Berlin and Brussels. The German army billets in Belgian towns and villages had been arranged and scheduled three years before a shot was fired in 1914, Prof. Wilden-Hart asserted.

The lecturer, who was professor of English at the Imperial Japanese University, Nagoya, from 1909 to 1915, and has written numerous works on the espionage systems in Russia, Germany, Japan, Poland and other countries, said that the German naval plans concerning the battle of Jutland were ascertained by British intelligence officers 24 hours before the Germans moved a vessel for the fight, and that as a matter of fact the English fleet moved first.

Will Hold Mammoth Banquet

Dinner at Olympia Largest Ever Given in World

More than eight thousand guests will be present at a banquet—believed to be the largest ever held in the world—which will take place at Olympia on August 8.

The dinner will be given by the United Grand Lodge of England in connection with its million memorial fund. The Duke of Connaught will preside.

Fifteen hundred waitresses will attend the guests who will require more than 50,000 plates and dishes, 24,000 glasses, and 10,000 pieces of cutlery. Messrs. Lyons and Co., Ltd., the caterers for the banquet, will supply the glass and china from their ordinary stock.

The cooking will be done in seven kitchens, which will be under the control of a central office, electrically fitted like the conning tower of a warship.

Dog Devoted To Master

Did Not Live Very Long After His Friend Died

By the death of Rex, a red-haired terrier, the house dog at the Hotel Victoria, Aldershot, shortly after the funeral of Lt.-Col. E. M. Murray, a remarkable story of a dog's devotion to a human friend is brought to light.

Rex was deeply attached to the colonel, who stayed at the hotel, and during the funeral ceremony Rex ran into the cemetery chapel and sat under the Union Jack draped coffin. He afterwards walked beside the cortege to the graveside. After the funeral Rex disappeared for two days. When he returned home he refused to eat or to be consoled, and pined away and died shortly afterward.

Earl Of Ypres Dead

British World War Hero Was Seventy-three Years Old

The Earl of Ypres, better known as Field Marshal French, British world war hero, died at Deal, England, May 22, aged 73.

Since his retirement from his post in Ireland in 1921, the Earl of Ypres had lived quietly. His last appearance, at a Canadian ceremony, was on July 8, 1923, when he assisted in the unveiling of a memorial erected by the Canadian battlefields commission near Ypres, to perpetuate the honor of those who fell in the second battle of Ypres.

His heir is his son, Viscount French.

Progress of the Dirigible

Cumbersome Machines Are Slowly Becoming More Air-Worthy

These are cumbersome affairs, unwieldly in gales, and in many respects they have hardly emerged from the experimental stage. Year by year, however, they become a little more air-worthy, a little more able to come safely through gales and mishaps. They are not so nearly masters of the skyroads as the aeroplane, but they seem to be slowly and sometimes painfully achieving that mastery.—New York Post.

Woman Manages Stock Farm

One of the largest stock farms in England is managed by a woman, Lady Barker, of Barwell Court, famous for its Percheron horses. Lady Barker is not only owner of the estate but is the actual superintendent of the farm stock.

Ex-Khedive Starting Bank

The ex-Khedive of Egypt, who lost his throne in 1914, is now starting a bank in Constantinople. He and his family are very rich, thanks to their possessions in Egypt. He is, of course, a Turk by descent.

Dainty Combination Undergarment

There are endless ways of trimming this exquisite combination and numerous pretty materials suitable for making it. Tee fitted camisole may be made with shaped shoulder straps or with straps of ribbon, lace or self-material. The envelope drawers, gathered to the camisole, are scalloped and finished with frills of lace. Soft, fine nainsook, crepe de chine or broadcloth silk will be beautiful if made up in this style; there is a vast opportunity to display hand embroidery or novel effects in drawn work or lace trimming. Combination undergarment No. 1010 cut in sizes 34 to 44 inches bust. Size 38 requires 1⅞ yard material 36 or 40 inches wide.

Aerial Company Organized

Aeroplane Taxi Business Is Flourishing in Southern Saskatchewan

Lieut. G. H. Clearwater, R.A.F., Saskatoon aviator, has moved all his flying equipment from Saskatoon to the south of the province. There he has organized a $10,000 aerial company with aeroplanes and hangars at Shaunavon and Truckee. He bought out the commercial aviation company at Moose Jaw and he now has four planes. Aeroplane taxi business, Clearwater says, has been flourishing all spring and one of the most important features of his summer programme is the transportation of Shaunavon doctors to their country calls. Two Shaunavon doctors have a territory of 200 miles, and the aviator has placed one "ship" entirely at their disposal. The physicians intend to use the air route for all their trips of greater distance than 10 miles from Shaunavon. Already the flyer has been receiving two and three calls a day from them since he started sky-shinning in March.

Rent Estates For Golf

Many English Landlords Obtain Revenue From Practical Idea

Many of England's great landlords are taking the defensive to steady their waning fortunes by putting idle sections of their vast estates on the credit side of the ledger. The novel remunerative method adopted last year on the estate of the old Cecil family in laying out and renting an eighteen-hole golf course has been adopted by many other owners this year, and carried further so as to include tennis courts and polo grounds.

Those cases where the estates are near cities have found the idea most practical. On weekends there have been steady streams of golfers who cannot afford to join expensive clubs to these links, where they are able to play for about a half-crown a round.

The Marquis of Queensbury has built tennis courts on his estate.

After the Holidays

"What is your favorite book?"
"My bankbook; but even that is lacking in interest these days."

Tablet Dedicated In Edison's Honor

Unveiled By His Wife At Menlo Park, N.J.

On the scene where he conceived many of his great inventions and carried on the experiments which resulted in the perfection of his greatest work, at Menlo Park, N.J., a bronze tablet commemorating these achievements was unveiled in honor of Thomas A. Edison recently. The tablet was the gift to the State of New Jersey of the Edison Pioneers, men who worked side by side with the inventor in the old days, and it was unveiled by Mrs. Edison, the inventor's wife, while prominent speakers related the tremendous effect his inventions had had upon the progress of mankind.

The tablet, set in a huge granite boulder with a base of concrete containing bricks from the foundation of the first Edison home in Menlo Park, is on the Lincoln Highway close to the original Edison laboratories and workshops. Participating in the affair were about 600 of Mr. Edison's friends and former associates, who sat in chairs placed directly on the highway, the traffic over which had been diverted for the occasion. The tablet bears this inscription:

"On this site—1879-1882—Thomas Alva Edison began his work of service for the world to illumine the path of progress and lighten labor for mankind. This tablet is placed by the Edison Pioneers to attest the gratitude of the industries he did so much to create."

King Refuses Legacy Of Welsh Castle

Countess Hoped It Would Be Permanent Residence For England's Kings

Disregarding ancient precedent set down by Roman emperors, King George recently declined to accept a legacy of Gwyrch Castle in Wales and $250,000 for its upkeep, bequeathed to him in trust by the Countess of Dundonald who died last year leaving an estate valued at more than $1,000,000. Hope was expressed in the countess' will that the castle would become a permanent residence for the kings of England and for the princes of Wales, but as the bequest has been declined by the ruler the property will pass, according to directions, to the Order of St. John of Jerusalem in England. The castle will be used by the order as a priory for residential and administrative purposes.

In connection with King George's refusal to receive the legacy it is recalled that the Roman emperors, from Augustus on down the line, vastly increased their private estates, as was the custom, by means of legacies from their loyal subjects.

Exploiting the Arctic

Canada Trying to Learn Extent of Riches in Far North

There are no insurmountable physical obstacles to the exploitation of the Arctic and especially of Baffinland, in which the Canadians are particularly interested. The northern portion of that great expanse of territory lies beyond the Arctic Circle, but it does not extend farther north than 75 degrees. The northern extremity of Spitzbergen passes the 80th parallel, and coal has been mined in Spitzbergen. In the years before the Great War several companies were engaged in the business. There was a time when Americans participated in it. What was done in Spitzbergen could be done in Baffinland or elsewhere in the Arctic. Certainly the Canadians are showing wisdom in attempting to find out the extent of the riches which may be concealed beyond the Arctic Circle. They may remember to their ultimate benefit that time was when Alaska, lying wholly within what was then regarded as the Far North, was derisively known as Seward's Folly.—Boston Transcript.

Awaiting Orders

The stationmaster on the East Indian Railway had been given strict orders not to do anything out of the ordinary without authority from the superintendent. This accounts for him sending the following telegram: "Superintendent's Office, Calcutta:—Tiger on platform eating conductor. Please wire instructions."—Jewelers' Circular.

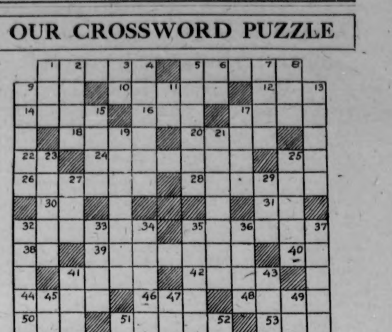
Find Great Grazing Area

Discovery of a great grazing area in the interior of British Columbia, more than 50 miles wide, and capable of maintaining 200,000 head of cattle throughout the year, was announced from the office of Hon. T. D. Pattullo, minister of lands, as the result of an exploration made by T. F. McKenzie, grazing commissioner for the province.

Suspicious

Kate.—"I will love you forever."
Kirk.—"Maybe so, but they tell me you get your hair curled every six months and call it a permanent wave!"

OUR CROSSWORD PUZZLE



Horizontal

1—Celestial bodies.
5—Musical instruments.
9—Earth.
10—Interlaced, as threads.
12—Haul.
14—Newly.
16—Our country (abbr.).
17—Sense.
18—Rodents.
20—The American ostrich.
22—Opposition.
24—One who utters peevish complaints.
25—Ancient Babylonian city.
26—Plundered.
28—Manipulate.
30—Seventh note of diatonic scale.
31—Belonging to the series of alcohols (chem. suffix).
32—Makes invulnerable.
35—Rankle.
38—Ever.
39—Sickness.
40—Toward.
41—Highland dialect.
42—On the ocean.
44—Assortments.
46—Ever (poet.).
48—Good.
50—Transgression.
51—Make haste.
53—Month of the year.
54—Stone.
55—Cook before a fire.

Vertical

1—Low, as a cow.
2—Smell.
3—Point of Compass.
4—Drenched.
5—The family circle.
6—Article.
7—Entreaty.
8—Bring legal action against.
9—Shoot of a plant.
11—Against (abbr.).
13—Shine brightly.
15—Crude boat.
17—Flowerless plant with feathery leaves.
19—Latticework frame.
21—Skies.
23—Meaty.
25—European owl of a tawny color.
27—Fasten together.
29—Period.
32—Navigates.
33—Organs of hearing.
34—Reposes.
36—One who is afraid.
36—Pace.
37—Rough and riotous.
41—Small cooking apparatus.
42—Babe.
45—Lubricate.
47—Suffix indicating one to whom an act is done.
49—Cereal grass.
51—Musical syllable.
52—Execute.

SUNDAY SCHOOL LESSON

JUNE 7

PETER'S BROADENING VISION

Golden Text: Of a truth I perceive that God is no respecter of persons. Acts 10.34.

Lesson: Acts 10.1 to 11.18.

Devotional Reading: Isaiah 61.1-9.

The Text Explained and Illumined

I. Peter Condemned by the Church at Jerusalem, verses 1-4. The apostles and the brethren at Jerusalem heard that Peter had preached to Gentiles in Cesarea, and on his return to Jerusalem they rebuked him, not for the preaching, but for having gone into the house of Gentiles and eaten with them—the scandal of it! "You went in to men uncircumcised and ate with them!" they exclaimed in horror. Up to this time Peter's authority had been unquestioned. It must have cut him to the quick to have his actions challenged. He did not quail, but justified his conduct, explaining the occurrences to them just as they had happened.

II. Peter's Vision and Its Lesson, verses 5-16. Webster defines a trance as "A state in which the soul seems to have passed out of the body into another state of being, or to be wrapped in visions; an ecstasy." It was while Peter was praying in the city of Joppa that he fell into a trance and had a vision by which God taught him a great truth.

Discover New Gas In Sun

Total Eclipse In January Gave Scientists Their Chance

A new gas has been discovered by scientists as a result of the observations made during the recent total eclipse of the sun, according to Professor Frederick Slocum, head of the Van Vleck Observatory at Wesleyan University.

Professor Slocum says that the only time the scientists can study the gas about the sun is when the sun is in total eclipse. In January, their brief observations determined that there is a gas there whose presence they had not recognized before.

Professor Slocum said scientists are not prepared as yet to name the gas or to discuss its probable properties.

Military Funeral For Dog

At Norfolk, Va., the reward of a faithful soldier was accorded "Peggy," English sheep dog, by members of the Veterans of Foreign Wars. They marched behind her flag-draped casket and fired a salute at the grave. "Peggy" fought with the British in Flanders, was several times wounded in action and was credited with having saved many lives.

It Bothered Him

Colonel Hugh Clark tells a good story of a clergyman in the old days who was offered an increase in his salary from $400 to $600, but refused it—because he had enough trouble in collecting the $400—Kingston Standard.

Mr. Rockefeller has given a million dollars to promote education in art. Probably he wants to stimulate the demand for standard oil painting.

Noted Singer Honored

Madame Albani Appointed Dame of the Order of the British Empire

Singular tribute was paid to Madame Albani, famous Canadian prima donna, who has been appointed dame of the Order of the British Empire, when royalty, representatives of the English society and prominent leaders in the world of arts, attended a benefit concert at Covent Garden today for the aged singer, who is now living in retirement in London.

The royal box was occupied by Princess Mary and many other royalties. Madame Albani, who occupied another box with her party, was presented with huge bouquets by Madame Melba, representing music, and Mrs. Kendal, representing the drama.

French Are Peaceful People

All Classes Living In Dread Of Another War

Contrary to foreign opinion—which will not understand—and will not learn—France is the most pacifist country in the world. I have talked with peasants in the fields, with professional men and intellectualists, with shopkeepers and politicians. The one idea that dominates their minds is the dread of another "inevitable" war. They are divided only, by hopeless disagreement, as to the policy by which that war may be averted.—Sir Philip Gibbs, in the World's Work, New York.

A Witty Speech

Bishop Vaughan, of Sebastopolis, a brother of the famous Father Bernard Vaughan, spoke at a recent dinner in London and made a witty speech. Among other things he said that at such dinners it was a good thing to have a "big gun"—a canon, or possibly a bishop or two. "But," he added, "you always find the bigger the gun, the bigger the bore. The longer the spoke, the bigger the tire."

Will Become Scottinsh Chief

Since the Duke of York took unto himself a Scottish bride he has evinced a particularly keen interest in Scotland. Now His Royal Highness is shortly to blossom out as a Scottish chief. He is soon to become chief of that vigorous London Scottish organization, the Scottish Association.

When a man is long on schemes he is usually short financially.

Note the flattened top of this fine kettle. No waste space above the water level. A very fast boiler, decidedly neat in appearance.

Hinged lid at side of kettle for speedy filling under tap or by dipper; being hinged it cannot fall off or get lost.

Handle, extra large rigid, shaped to fit the hand and always cool; being rigid you have perfect control at all times.

Well made, generous sized properly curved spout. Tip of spout well above water line to prevent overboiling or spilling.

This kettle is made in SMP Pearl and SMP Diamond Enamelled Ware, also in nickel plated copper ware. The name Savoy and our trade mark on each genuine kettle.

SMP ENAMELED TEA KETTLE

A Romance of the Spanish Main

CAPTAIN BLOOD

RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini

"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

CHAPTER XXI.—Continued

"He said that!" she cried. "He did that! Oh!" she turned away, and through the slender, clustering trunks of the bordering orange trees she looked out across the glittering waters of the great harbor to the distant hills. Thus for a little while, my lord standing stiffly, fearfully, waiting for fuller revelation of her mind. At last it came, slowly, deliberately, in a voice that at moments was half suffocated.

"What weighs—oh, so heavily and bitterly—is the thought that but for the words in which yesterday I recalled him, he might have been saved. And now he is lost—back at his outlawry and piracy, in which ultimately he will be taken and destroyed. And the fault is mine—mine!"

"You have no cause for shame," said he. "As for your sorrow—why, it is will afford you solace—you may still count on me to do what man can to rescue him from this position."

"You will do that!" she cried with sudden eager hopefulness. "You promise?"

"I promise," he answered her. And then, retaining still the hand she had surrendered to him—"Arabella," he said very gently, "there is still this other matter upon which you have not answered me. This matter that concerns myself, and all my future, oh, so very closely. This thing that I should believed, that prompted him . . . that . . . that you are not indifferent to me." He saw the fair face change color and grow troubled once more.

"Indifferent to you?" said she. "Why, no. We have been good friends; we shall continue so, I hope, my lord."

"Friends! . Good friends?" He was between dismay and bitterness. "It is not your friendship only that I ask, Arabella. You heard what I said, what I reported. You will not say that Peter Blood was wrong?"

Gently she sought to disengage her hand, the trouble in her face increasing. A moment he resisted; then, realizing what he did, he set her free.

"Arabella!" he cried on a note of sudden pain.

"I have friendship for you, my lord. But only friendship."

"Is it Peter Blood?"

"Peter Blood?" she echoed. "I do not know," she said, faltering a little.

When the Jamaica fleet put to sea some few days later, Lord Julian sailed with Colonel Bishop in Vice-Admiral Craford's flagship. They cruised awhile off Hispaniola, watching the Windward Passage, but they cruised in vain, and, after a month of it, returned empty-handed to Port Royal, there to find awaiting them the most disquieting news from the Old World.

The megalomania of Louis XIV. had set Europe in a blaze of war. The French legionaries were ravaging the Rhine provinces, and Spain had joined the nations leagued to defend themselves from the wild ambitions of the King of France. And there was worse than this: there were rumors of civil war in England, where the people had grown weary of the bigoted tyranny of King James. It was reported that William of Orange had been invited to come over.

"Then with Blood dead, perhaps she will come to her senses."

Weeks passed, and every ship from home brought additional news. William had crossed to England, and in March of that year, 1689, they learnt in Jamaica that he had accepted the crown and James had thrown himself into the arms of France for rehabilitation.

To a kinsman of Sunderland's this was disquieting news, indeed. It was followed by letters from King William's Secretary of States informing Colonel Bishop that there was war with France, and that in view of its effect upon the Colonies a Governor-General was coming out to the West Indies in the person of Lord Willoughby, and that with him came a squadron under the command of Admiral van der Kuylen to re-enforce the Jamaica fleet against eventualities.

Bishop realized that this meant the end of his supreme authority, even though he should continue in Port Royal as Deputy-Governor. Lord Julian, in the lack of direct news to himself, did not know what it might mean to him. But he had been very close and confidential with Colonel Bishop regarding his hopes of Arabella, and Colonel Bishop more than ever, now that political events puts him in danger of being retired, was anxious to enjoy the advantages of having a man of Lord Julian's eminence for his relative.

"There is one obstacle in our path," said his lordship. "Captain Blood. The girl is in love with him."

"Pon-the-braces baggage! By God! I'll bring her to her senses."

"Don't be a fool, Bishop. Listen, man. She has a constant mind. As long as Blood lives she will wait for him."

"Then with Blood dead, perhaps she will come to her silly senses."

"Now you begin to show intelligence," Lord Julian commended him. "That is the first essential step."

"And here is our chance to take it." Bishop warmed to a sort of enthusiasm. "This war with France removes all restrictions in the matter of Tortuga. We are free to invest it in the service of the Crown. A victory there and we establish ourselves in the favour of this new government."

"Ah!" said Lord Julian, and he pulled thoughtfully at his lip. Bishop laughed coarsely.

"We'll hunt this rascal in his lair, right under the beard of the King of France, and we'll take him this time, if we reduce Tortuga to a heap of ashes."

On that expedition they sailed two days later—which would be some three months after Blood's departure—taking every ship of the fleet, and several lesser vessels as auxiliaries. To Arabella and the world in general it was given out that they were going to raid French Hispaniola.

CHAPTER XXII.
The Service of King Louis

Meanwhile, some three months before Colonel Bishop set out to reduce Tortuga, Captain Blood, bearing hell in his soul, had blown into its rock-bound harbour ahead of the winter's gales, and two days ahead of the frigate in which Wolverstone had sailed from Port Royal a day before him.

In that snug anchorage he found his fleet awaiting him—the four ships which had been separated in that gale off the Lesser Antilles, and some seven hundred men composing their crews.

His captains, Hagthorpe, Christian, and Yberville, were on the jetty to receive him, and with them were some hundred of his buccaneers. When they plagued him with questions, he bade them await the coming of Wolverstone, who would satisfy their curiosity, and took his way alone to the fine house of M. d'Ogeron, there to pay his respects to his friends, the Governor and the Governor's family.

When the Old Wolf cast anchor in the bay two days later, it was to him all turned for the explanation they were about to demand of Blood. Now Wolverstone had only one eye; but he saw a deal more with that one eye than do most men with two; and he had the sound heart of a boy, and in that heart much love for Peter Blood.

Anon when ashore he was beset by questioning buccaneers, it was from their very questions that he gathered exactly how matters stood, and perceived that either from lack of courage or other motive, Blood, himself, had refused to render any account of his doings since the Arabella had separated from her sister ships.

"The Captain was ever a modest man," he explained to Hagthorpe and those others who came crowding round him. "It's not his way to be sounding his own praises. Why, it was like this. We fell in with old Don Miguel, and when we'd scuttled him we took aboard a London pimp sent out by the Secretary of States to offer the Captain the King's commission if so be him'd quit piracy and be o' good behaviour. The Captain damned his soul to hell for answer. And then we fell in wi' the Jamaica fleet and that grey old devil Bishop in command, and there was a sure end to Captain Blood and to every mother's son of us all. So I goes to him, and 'accept this poxy commission,' says I; 'turn King's man and save your neck and ours.' He took me at my word, and the London pimp gave him the King's commission on the spot, and Bishop all but choked himself with rage when he was told of it. But happened it had, and he was forced to swallow it. We are King's men all, so into Port Royal we sailed along o' Bishop. But Bishop didn't trust us. He knew too much. But for his lordship, the fellow from London, he'd ha' hanged the Captain King's commission and all.

(To be continued

Would Enjoy Moose Hunt

Prince of Wales Replies to Letter Nipigon Man

Neil McDougall, who five years ago showed the Prince of Wales how to hook speckled trout along the banks of the Nipigon River, told the Toronto Women's Press Club of a letter written by His Royal Highness's secretary shortly before the departure for South Africa. Replying to Mr. McDougall's renewed invitation for a moose hunt, the secretary expressed the Prince's delight at the proposal, and stated that he would certainly make arrangements to stop off at Nipigon on his next visit to the E.P. Ranch, which, he hoped, would be next fall—"that is, providing you don' try to marry him off," the letter concluded, naively.

Death On Warts

Apply Minard's daily. Warts dry up and disappear. Also relieves bunions.

MINARD'S "KING OF PAIN" LINIMENT

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Bloomington, N. S.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, also for nervousness, sick headaches and sleeplessness. I was troubled in this way for over a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonial."—Mrs. WILLIAM MOASE, Bloomington, Annapolis County, N. S.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex should listen to what other women say who have experienced the same sufferings and found relief. Give this dependable medicine a chance—and at once. It is sold at all drug stores.

ODGEN'S CUT PLUG Smoking Tobacco
OGDEN'S FINE CUT (Pipe or Cigarette Tobacco)

Always ask for the Famous Vacuum (Air-Tight) Tin

Can Control Electric Trains By Radio

Conductor and Engineer Could be Eliminated Says New York Expert

According to Mr. G. Y. Allen, radio expert, of New York, through the use of modern developments in radio, it is entirely possible to operate electric trains from a central control office.

Mr. Allen does not advocate the elimination of the engineer, the conductor and train crew, although he says it now is entirely feasible, through the combination of automatic control and radio supervisory control, to start a train without a crew, run it at full speed over clear tracks, slow it down or stop it, in accordance with the signals of an automatic block signalling system, start it up again when the signals clear, stop it at its next station stop and open its doors.

"The supervisor at the central office would receive complete information by radio at all times as to the position and operation of the train," Mr. Allen explained. "He could take personal charge of its operation at any time; and he could talk directly to the passengers to give them any desired directions."

New Zealand Tourist Makes Unusual Request

Wanted to Make His Own Bed in Hotel

Hale and healthy at 91, John G. Kelley, well-to-do farmer of New Zealand, stepped briskly up to the desk in one of San Francisco's most exclusive hotels and addressed the clerk, who smilingly held out a pen to the prospective guest.

"Not so fast, young man," he cautioned. "I've got one request to make before I write my name in that book. If I stop at this hotel I want it understood that I'm to be permitted to make my own bed. I've been doing it for 89 years now and, well—it's got to be kind of a habit, you might say."

Kelley said he was on his way to Ireland, where a sister died recently, leaving him £30,000.

To Build More Elevators

Tenders for the construction of 89 elevators for the Saskatchewan Wheat Pool, Elevators, Limited, have been called. The first batch of new grain elevators will be constructed at points where neither the Saskatchewan Co-operative Elevator Company nor the United Grain Growers, Limited, have elevators at present.

Canadians Great Butter Eaters

With 3,600,000 milch cows, 300,000 dairy farmers, 1,500 creameries and many thousands of cheese factories, Canadians are the greatest butter eaters in the world, according to D'Arcy Scott, secretary of the national dairy council of Canada. Their per capita consumption in 1923 was 27.43 pounds.

For Aches and Pains Use Minard's Liniment

Water Clocks Used By Ancient Greeks

Hours of Day in Summer Longer Than Hours of Night

By the ancient Egyptians the day was divided into 24 hours of equal length. The Greeks adopted a different system, dividing the day, that is, the period between sunrise and sunset, into 12 hours, and also the night. Whence it followed that it was only at two periods of the year that the length of the hours during the day and night were uniform. In consequence, those who adopted the Greek system were obliged to furnish their water clocks with a compensating device so that the equal hours measured by those clocks should be rendered unequal according to the exigencies of the season. In summer, when the period of daylight is longer than the period of darkness, the hours of the day were longer than the hours of night, because day and night, whether long or short, were each divided into 12 hours.

This water clock of the ancient Greeks, also used by the Romans, was called clepsydra, from two Greek words, meaning to steal water.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Meant it Kindly

An Isle of Wight clergyman, returning to his parish after a prolonged absence, astonished a meeting of the Guild of Dear Old Souls by exclaiming cheerfully, "I am delighted to see so many old Cowes faces around me!"

To Install Radio Fog Stations

Radio fog stations, which will send out continuous signals, enabling fog-bound ships to determine their positions, are to be installed at seven points on the United States' shores of the Great Lakes.

"What word in four letters beginning with 'h' means everything?" asked the crossword puzzler. And then he did not appear satisfied when someone said "hash."

Palestine To Have Its Own Coinage

Over Thousand Years Since Last Coins Were Issued By Jews

Palestine, by a recent decision of the British Government, is to have its own coinage, the names of the units—shekels, dinnars and prutahs—being those used in an ancient monetary system closely connected with Jewish history.

It was about one thousand eight hundred years ago that the last coins issued by a Jewish nation were put into circulation.

GIVE CONFIDENCE TO YOUNG MOTHERS

A simple and safe remedy for the common ills of childhood should be kept in every home where there is a baby or young child. Often it is necessary to give the little one something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth. Experienced mothers keep Baby's Own Tablets on hand for such purposes and young mothers can feel safe with a box of the Tablets ready for emergencies. The Tablets are a mild but thorough laxative that act without griping and they are guaranteed to be absolutely free from opiates or other harmful drugs. They are sold by all druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Believes Canada Will Be Leader

Hon. Wm. Morrow, L.M.C., member of the legislative council of the Upper House of South Australia, who arrived in Toronto recently, predicts that within a few years, Canada, and Ontario particularly, will be among the leading countries of the world.

One minute after garlic is eaten by the cow the flavor is present in the milk.

Keep Your Shoes Neat

2 IN 1 WHITE Shoe Dressing

CAKE OR LIQUID

Fresh and carefully packed in pure olive oil. Keep a stock in the pantry for easily prepared, enjoyable meals.

KING OSCAR SARDINES

BIG DRIVE FOR POOL MEMBERS

The Big Province-wide Drive for Memberships in the Provincial

Dairy, Livestock and Poultry Pools

will be on for

THREE WEEKS
JUNE 8 TO 28

FARMERS:

Be Ready for the Canvassers when they call. Attend the Pool Meetings in your district and Get Full Information on what these pools will mean to you.

PHYSICAL CULTURE MANIPULATION

Not a "CURE ALL" for specific or contagious disease, but will be found very valuable to ALL people, especially those who are ill, or disposed to attacks of illness or discomfort.

P. D. HESS
4th Avenue East Oyen, Alberta

PUBLIC MEETINGS

of interest to every citizen of the district will be held as follows:

SIBBALD	Tuesday, June 9, at 8 p.m.
OYEN	Wednesday, June 10, at 2 p.m.
CEREAL	Thursday, June 11, at 8 p.m.
CHINOOK	Friday, June 12, at 2 p.m.
YOUNGSTOWN, Sat.,	June 13, at 2 p.m.

SPEAKERS

DEAN HOWES, Dean of the Faculty of Agriculture, University of Alberta, Edmonton.

The Dean is speaking under the auspices of the local Agricultural Societies. He is a very pleasing and instructive speaker. You should not miss hearing him.

LORNE PROUDFOOT, M.L.A. and others.

Subject—Co operative Marketing, more particulary the Livestock, Dairy and Poultry Pools.

Through the co-operation of all, Acadia led the province in the Great Wheat Pool Drive of 1923. The same measure of support is solicited for the Big Drive for the Livestock, Dairy and Poultry Pools June 8th to June 28. Whether resident in town or country show your interest in this great forward movement by your presence and support at these meetings.

Here and There

During 1924 the 1,800 bee-keepers of Manitoba marketed 1,302,000 pounds of honey, valued at $195,-000, according to official returns by the Provincial Apiarist.

Prof. J. A. Allen, Provincial Geologist of Alberta, declares in an official statement that sixty-two billion tons of coal, half of which is recoverable, lie beneath the surface of Alberta soil.

Seymour Backus, Vice-President of the Backus-Brooks Company, of Winnipeg, states that the largest producing pulp mill in the world will be in operation at Kenora, Ont., before the end of 1925.

It is estimated that Vancouver will ship approximately 25,000,000 bushels of grain of the 1924 crop. Shipments already total 21,188,000 bushels. Commitments for almost 1,000,000 additional bushels have been made.

Student tours, operated by the Canadian Pacific in conjunction with McGill University, are to be extended this summer to include students from the British Isles. Heretofore, these tours have been restricted to scholars in other parts of Canada and in the United States. As Montreal is regarded as an ideal centre for the study of the French language, it is anticipated that the new project will attract many visitors to the Canadian metropolis.

The body of Dr. Sun Yat Sen, President of Southern China lay in state in a wonderful blue-tiled old Temple near the "Altar of Heaven," during the long drawn out ceremonies at Peking attendant upon his interment. Through the courtesy of the government the bier was viewed by a large party of Canadians and Americans touring the world on the Canadian Pacific S.S. "Empress of France." They were also invited to attend the final burial rites which, with a wealth of colorful Chinese ceremony took place later in the Western hills.

About Town and Country

The Excel W. I. will hold a lawn social and programme at the Excel School House on June 12, commencing at 6.30 p.m. Indoor baseball, women vs the men, Novelty races, and Debate.

* * *

The Cereal Golf Tournament, scheduled for to day has been postponed on account of rain.

* * *

T. M. Nunn returned to Oyen last Friday after spending six weeks at The Pas, Man., and district.

* * *

Mrs. Long, who has been attending the Alberta Women's Institute convention in Edmonton, returned to Oyen yesterday.

* * *

Mrs. C. R. Corcoran and daughter Lorna, returned to town yesterday from Edmonton, where Mrs. Corcoran has been attending a Missionary convention.

* * *

A pleasing musical number was given during service at the Union Church last Sunday, by Alberta Wenger, Margaret and George England and Harold Charter. The choir, composed mostly of young people, under the direction of Mrs. M. G. Whitlock since Easter, has been winning well earned praise.

* * *

Under the auspices of Oyen Women's Institute, a pianoforte recital will be given in the Union Church by the pupils of Mr. Shuttleworth, on Wednesday, June 17. Admission by program 50 cents.

* * *

W. V. Miller has moved his implement and insurance business from his office on Railway Avenue to the store formely occupied by the C. P. Johnston clothing establishment on Main Street.

* * *

Under the auspices of All Saint's Guild, supper will be served on the ground floor of the Masonic Hall, Oyen, on Saturday, June 6. 40 cents a plate. Everybody welcome.

* * *

P. D. Hess, of Oyen, has been charged with practising Chiropractic without being registered as required by the Chiropractic Act of 1923. A hearing of the case will be held in the A.P.P. barracks at 8 p.m. on Thursday, June 4.

* * *

The confirmation of Miss Mina Oyen occurred on Sunday, May 24, at the Calvary Lutheran Church Pastor Luke officiating. Miss Oyen is expected to return to Oyen in the near future.

* * *

The special train operated by the Canadian Pacific Railway and known as The Trans-Canada Limited, which makes the journey across the entire country in eighty-eight hours, recently commenced its season, the seventh since its inception.

According to a bulletin issued by the Bureau of Statistics Alberta's foreign population is in excess of 180,000 with approximately 100,000 American included in the total. About 5,000 Americans reside in Calgary.

When Their Majesties King George and Queen Mary paid their official visit to the British Empire Exhibition at Wembley shortly after the reopening, they boarded the miniature Canadian Pacific train and made a trip around "Treasure Island" and expressed great interest in all they saw.

An effort will be made this year to transplant Swiss mountain roses in the Canadian Rockies. These roses, which were brought from Switzerland by Dr. Huebscher, late Swiss Consul at Montreal, are extremely hardy and only thrive above elevations of 5,000 feet. They will be planted in the gardens at Lake Louise and Banff.

A Liberal convention will be held in Cereal on Thursday, June 18, when a candidate will be nominated. All liberals and their friends are invited to attend. Hon. C. R. Mitchell will be present.

Excel U.F.A. is holding its annual sports day at Excel on July 1st. Watch for posters.

Help To Make Your Town Beautiful

The village council would like to see residents of Second Avenue take care of the trees planted along the road side. The expense of a gardener or someone to care for them is not necessary if each property owner or occupier will care for the trees opposite their property. The most important item is to warn the children not to damage the trees. Weeds and grass growing around the trees can be kept down with only a few moments work, once in a while, with a hoe. Some citizens have already done this and the council is glad to see such interest taken in the trees.

CLASSIFIED ADS.
